

I have already sold **AI agents** to your buyer. **At Pixis. For 14 months.**

An AI marketing platform (RL bid optimization, generative creative, audience modeling) deployed to 8 enterprise revenue teams. \$15K-\$90K per-client monthly. Now offering Artisan the same playbook.

Fashion D2C, 1 month, holdout incrementality

-50%

CLIENT CHURN CUT

Renewal playbooks + mid-quarter channel resets

Why Artisan and Pixis share a buyer shape

Artisan sells AI Employees (starting with AI BDR) to revenue teams. Pixis sells an AI Marketing Platform to revenue and marketing teams. The buyer, the AI-trust narrative, and the renewal motion are the same.

BUYER MATCH

CMO / VP RevOps

Pixis: weekly QBRs with CFOs and growth leads at 8 enterprise clients. Artisan ships to the same persona.

AI TRUST NARRATIVE

Human-in-Loop

Trained 8 enterprise teams on RL bid optimization + generative creative + pLTV pacing. I know how to communicate AI to a skeptical CFO.

MULTI-CHANNEL GROWTH

-25% CPA

Plug Power MarTech rebuild. Google + Meta + LinkedIn + programmatic + email. AEO/GEO for AI buyer queries.

ARTISAN GROWTH JD NEED	DIRECT EVIDENCE
Sell AI to revenue teams	Pixis: deployed AI marketing platform to 8 enterprise clients, trained their teams, drove product adoption.
Multi-channel demand gen	Plug Power: -25% CPA, +20% conversion across Google + Meta + LinkedIn + programmatic + email.
Lifecycle and renewal motion	Pixis: cut client churn 50% via renewal-aligned playbooks documented in writing.
AI-builder credibility	Founded SwipeHire on Python + OpenAI + React. 4 Anthropic Claude certifications.
Data-driven experimentation	3x ROAS validated by holdout incrementality testing. 8+ A/B tests on SwipeHire activation.

The Pixis-to-Artisan playbook

I have already done the harder version of Artisan's go-to-market: convincing enterprise revenue leaders to trust an AI engine to allocate their budget. That experience transfers directly.

What I have shipped for the AI-skeptical revenue buyer

- **Trained 8 enterprise teams** on Pixis Codex: reinforcement-learning cross-channel bid optimization, generative creative variant testing, pLTV-weighted budget pacing
- **Weekly QBR cadence** with CFOs and growth leads. Translated AI engine output into stakeholder-ready impact narratives
- **Per-client renewal playbooks** documented in writing. Mid-quarter channel replacement when KPIs slipped. Zero account loss across 8 clients
- **3x ROAS validated** for a fashion D2C partner in 1 month via holdout incrementality testing
- **Drove product feedback** into Pixis roadmap from real client friction (bid model overfit, creative gen brand drift, attribution gaps)

"I have lived the customer-side reality of selling AI to revenue teams. I know what convinces them, what loses them, and what makes them renew."

How I would ramp at Artisan

- **Week 1-2:** Sit with 5 customers + 2 internal Sales reps. Map current onboarding curve days-to-first-result. Audit current paid + content + email funnels.
- **Week 3-4:** Stand up paid pilot on LinkedIn + Google for "AI BDR" and "AI sales agent" search intent. Build attribution dashboard tying source to revenue.
- **Month 2:** Ship 3 case studies anchored to single hero metrics (meetings booked per AI BDR, pipeline generated, ramp time saved). Launch comparison page (Artisan vs. status quo).
- **Month 3:** Documented playbook for the next 2 growth hires. Standing weekly rhythm with Sales + CS. Owning a measurable inbound pipeline number.

AI sells to AI buyers

Multi-channel

Renewal motion

AI builder

My 30 / 60 / 90 at Artisan

| *SF or NYC, \$130-180K, 3+ Yrs. Calibrated to seed/Series-A AI revenue velocity.*

30

Days 1-30: Customer interviews + funnel audit. Map ICP segments. Ship paid pilot + 1 case study. Sit with Sales on the AI BDR onboarding workflow to identify where Artisan agents win vs. lose deals.

60

Days 31-60: Launch comparison content (Artisan vs. SDR-as-a-service, Artisan vs. building it yourself). Build attribution dashboard. Stand up retention measurement: meetings booked per AI BDR per ICP.

90

Days 61-90: Own a measurable inbound pipeline number. AEO/GEO programs so Artisan shows up in ChatGPT/Claude queries on AI sales. 5+ case studies live. Documented playbook for next hires.

The AI-builder angle

Founded **SwipeHire** on **Python + OpenAI API + React** (app.swipehire.io). 50+ users, +25% activation, zero paid budget. I can read Artisan's tech docs as a builder.

Plus 4 Anthropic Claude certifications. I think in your stack.
