Hiring Team, Attentive,

The Principal PMM role sits at the intersection of three things I have spent the last four years on: **positioning AI-powered SaaS platforms, running SMS and email lifecycle programs for D2C brands, and translating complex AI capabilities into measurable buyer value**. Attentive's omnichannel SMS + RCS + email + push story is exactly the kind of multi-product narrative I have been building - first at Pixis, then at Sensata.

Direct evidence of fit:

- **SMS and email lifecycle on Klaviyo (GenY Medium):** Owned cart recovery, win-back, post-purchase, and VIP segments for a D2C brand. Lifted conversion **36%** and revenue **25%**; delivered **16x ROAS** via Google Merchant + Meta catalog rebuilds.
- **Pixis (AI-powered marketing SaaS):** Managed an 8-client D2C portfolio with monthly media of **\$15K-\$90K per client**; ran retention and lifecycle programs on Klaviyo, AppsFlyer, and Adjust. Cut churn **50%** via documented playbooks; delivered **3x ROAS** in one month for a fashion brand. Translated AI-platform value into language non-technical CMOs would buy.
- **Positioning, competitive intel, and platform GTM at Sensata:** Ran **30+ structured customer interviews** to shape product positioning and competitive narrative; **+12% YoY revenue, +8% market share, CSAT +22%**. Led GTM for new product lines: **\$2M+ first-year revenue**.
- **Sales enablement at scale:** Built a battlecard, deck, and ROI-calculator library used by **50+ reps; win rates +30%**, qualified leads **+35%**. Coordinated storytelling with Brand, Content, Product, Sales, Demand Gen, and Customer Success - the same cross-functional shape Attentive's PMM team runs.
- **AI-driven buyer search at Plug Power: -25% CPA, +20% conversion.** Rebuilt MarTech stack on HubSpot + Salesforce + Adobe + GA4 + GTM with closed-loop attribution. Comfortable simplifying technical AI concepts for executive audiences.

On qualifications: I hold an MS in Marketing Analytics from **Simon Business School (U. of Rochester)**, an **Advanced Pricing certification**, and have built and shipped an AI product end-to-end on Python + React. US-based, remote-ready. Looking forward to talking.
