

FOUNDING GROWTH PITCH DECK

Built for CPG growth. Shipped AI products solo. Ready for NYC.

I have run growth for D2C consumer brands, deployed an AI ad platform to 8 enterprise clients, and shipped an AI tool end-to-end on Python + OpenAI API + React.

16x

ROAS FOR D2C BRAND

GenY: Google Merchant + Meta catalog rebuild

\$1.4M

PIXIS PORTFOLIO MANAGED

8 enterprise clients, \$15K-\$90K/mo each

50+

SWIPEHIRE USERS

Zero paid budget; founder-led distribution

Why this is a 1:1 fit for OLIPOP, Simple Mills, Dr. Squatch buyers

From the Confido JD: "Plan and execute innovative marketing initiatives across multiple channels including social media, events, email campaigns, and digital content... Develop high-quality content... Maintain and optimize Confido's website... Make data-driven decisions."

D2C CONSUMER TRACK RECORD

16x ROAS

GenY Medium: Google Merchant Center + Meta catalog rebuild. Klaviyo lifecycle email (cart, post-purchase, re-engagement). 2x lift on email-attributed revenue per send.

AI PLATFORM CSM

8 clients

Pixis B2B SaaS AI marketing platform. \$15K-\$90K per-client monthly budgets. 3x ROAS in 1 month via holdout incrementality. -50% client churn.

MULTI-CHANNEL + CONTENT

-25% CPA

Plug Power: Google + Meta + LinkedIn + programmatic + email. 3 industry conferences and 6+ webinars coordinated. Closed-loop attribution rebuilt from scratch.

CONFIDO JD REQUIREMENT	DIRECT EVIDENCE
Multi-channel marketing (social, events, email, digital content)	Plug Power: paid + email + SEO/AEO + 3 conferences + 6 webinars. Pixis: managed 8 clients across paid channels at scale.
High-quality content (newsletters, video tutorials, product announcements)	Sensata: sales enablement library used by 50+ reps, lifted win rates 30%. Plug Power: product announcements, case studies, long-form web content.
Website optimization, drive qualified inbound	Plug Power: rebuilt UTM spec, GTM containers, lead routing into Salesforce. AEO/GEO programs. CRO via A/B testing.
Data-driven, analytical	MS Marketing Analytics from Simon. SQL + Power BI + Python at Sensata. Holdout incrementality at Pixis. Closed-loop attribution at Plug Power.
Build creative content for various buyer personas	Sensata: 30+ OEM/distributor interviews translated to VP/C-level positioning. GenY: D2C creative variants tested against fatigue cycles weekly.

The D2C playbook I bring to Confido

Confido sells to brands like OLIPOP and Simple Mills. Most marketing resumes you'll see have built for enterprise SaaS. Mine has built for the brands you sell to.

What I've shipped for D2C brands

- **Google Merchant Center + Meta catalog rebuild** at GenY: feed cleanup, schema fixes, structured Shopping campaigns, Advantage+ catalog, weekly creative refresh tested against fatigue cycles → **16x ROAS**
- **Lifecycle email on Klaviyo + Shopify**: cart abandonment, post-purchase, re-engagement; 2x lift on email-attributed revenue per send
- **Pixis fashion D2C partner**: 3x ROAS in one month, validated via holdout incrementality testing
- **Pixis iOS app paid UA** via Appsflyer + Adjust for consumer-mobile clients (SKAN-era post-IDFA attribution + cohort LTV)

"The bar at Confido is shipping fast and clean for a CPG buyer who has been burned by generic agencies. I have lived that audience."

Where I'd start on day 30

- **Audit Confido's website** against current ICPs (Tropicana vs. OLIPOP vs. Simple Mills). Identify 3 conversion leaks; ship fixes
- **Stand up a customer story factory**: interview 2 customer marketers per week, ship one case study + one product announcement weekly
- **Run paid pilot** on LinkedIn + Google for "CPG accounting automation" and "trade promotion management" keywords; track CAC payback by ICP
- **Build retention measurement**: Klaviyo + GA4 + Salesforce closed-loop attribution for the website. AEO/GEO so Confido shows up when buyers query AI assistants about CPG ops

D2C-fluent

Multi-channel

Content-shipper

Data-driven

My 30 / 60 / 90 at Confido

Calibrated to NYC 5-day-in-office, founder-direct work, and 5x YoY growth velocity.

30

Days 1-30: Audit current ICPs (top 20 customers), website analytics, paid channel performance, and current content cadence. Sit with 3 customer marketers + 3 internal Sales reps. Ship 1 product announcement + 1 case study using Confido's tech.

60

Days 31-60: Stand up a weekly customer story rhythm. Launch a paid pilot on LinkedIn + Google targeting CPG growth/finance buyers. Rebuild the website signup funnel (3 hypotheses I want to test).

90

Days 61-90: Own a measurable inbound number. Have a content engine running weekly (newsletter + 1 long-form + product release notes). Hand off a documented playbook so the next 2 marketing hires can ramp fast.

Why an AI-builder matters here

Confido is AI-native. The Founding Growth hire should be too. I founded **SwipeHire**, an AI tool I shipped solo on **Python + OpenAI API + React** (app.swipehire.io). 50+ early users, +25% activation across 8+ A/B tests, zero paid budget.

Plus 4 Anthropic Claude certifications (Claude 101, Claude Code 101, Claude Cowork, Building with Claude API). I do not just write about AI - I have shipped it.
