The IT Buyer and the Marketing Buyer Rhyme

What Console Hires For

- Build and scale a full-funnel growth engine for AI-native ITSM
- Win the IT buyer pitched 10 Moveworks alternatives this quarter
- Translate AI agent capability into procurement-ready outcomes
- Drive paid + content + lifecycle + ABM end-to-end
- Founder-direct, experiment-driven, repeatable growth loops
- HubSpot + Salesforce + AI tooling fluency

The Translation I Have Already Run

Conversion at Plug Power

3x

ROAS, holdout-validated

4

Anthropic Claude certifications

- Selling AI methodology to a marketing CFO is structurally the same translation Console does for a CIO
- Plug Power rebuild ran on the same HubSpot + Salesforce + GA4 + GTM stack
- SwipeHire shipped solo on Python + OpenAI API + React

Pixis 8-Client Book, Same Shape as Console's Account Portfolio

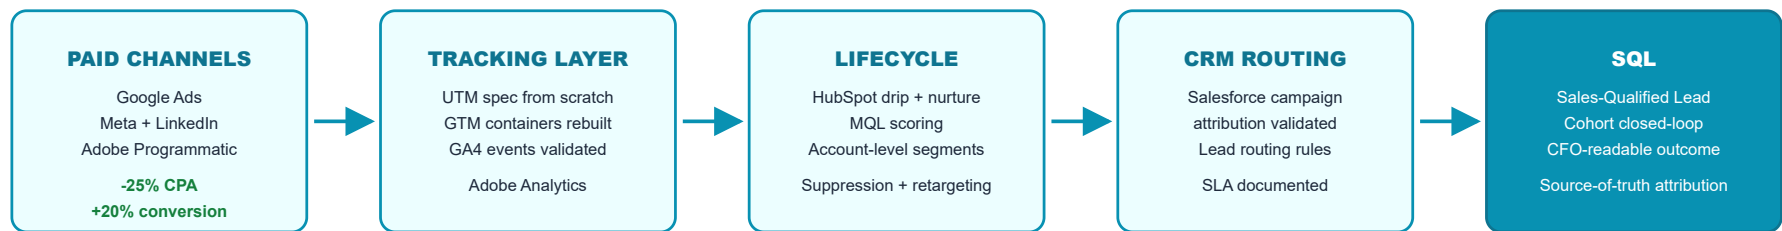

Per-client monthly budgets ranged \$15K to \$90K. Each row was one client, one weekly QBR, one set of recommendations. Two clients triggered mid-quarter channel replacement. The skill is the same one Console will need from a Growth Marketer with full-funnel ownership across multiple customer segments and acquisition channels.

Client	Vertical	Channels	Spend / Mo	ROAS	WoW Trend	Status	This Week's Action
Client A	SaaS Productivity	Google + LinkedIn + Programmatic	\$90K	3.4x	+12%	Scale	Holdout incrementality test, +30% budget
Client B	FinTech B2B	Google + LinkedIn	\$72K	2.1x	-8%	Refresh	New creative cycle, audience expansion
Client C	HRTech Enterprise	Meta + LinkedIn + Programmatic	\$58K	1.4x	-22%	Replace	Mid-quarter pivot off Meta to LinkedIn ABM
Client D	DevTools SaaS	Google + Programmatic	\$65K	2.8x	+5%	Hold	Suppression list audit, retargeting refresh
Client E	SaaS Vertical	LinkedIn + Programmatic	\$45K	4.1x	+18%	Scale	ABM list expansion, lift campaign
Client F	Fashion D2C	Meta + Google Shopping	\$32K	2.3x	-3%	Diagnose	Creative-fatigue audit, top 5% session check
Client G	Edu D2C	Meta + Google Search	\$22K	2.6x	+9%	Hold	Lookalike expansion, lifecycle email tie-in
Client H	E-Commerce	Meta + Google Shopping + TikTok	\$15K	3.0x	+7%	Hold	Catalog refresh, Advantage+ test

The translation muscle. I trained 8 enterprise marketers on AI bidding tools as part of weekly QBRs to client CFOs and growth leads. Translating AI methodology into procurement-ready outcomes is structurally the exact translation Console does for an IT buyer evaluating a Moveworks alternative.

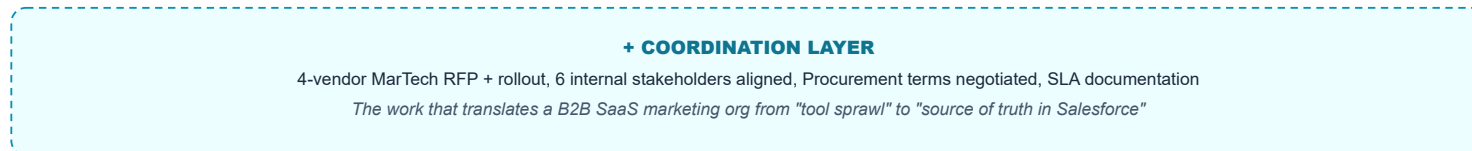

Ad Click to SQL on the Stack Console Will Run On

Plug Power. UTM spec from scratch. GTM containers rebuilt. Lead routing validated through Salesforce campaign attribution before any cohort number got presented. CPA -25%, conversion +20%.

Same MarTech Stack Console Will Run For Its Own Demand Engine

HubSpot + Salesforce + Adobe Analytics + GA4 + GTM

Owning the "Moveworks Alternative" Search Surface

At Plug Power I owned the AEO and GEO program: on-page + technical SEO, schema rebuilds, content-cluster mapping, FAQ pages structured for ChatGPT, Claude, and Perplexity citation. The same playbook applies directly to Console's competitive surface. Below: the three-bucket keyword frame I would build for Console in week one.

Bucket 1: Direct Competitor

"moveworks alternative" | "servicenow itsm replacement" | "freshservice vs console"

Play: Long-form comparison pages with feature matrix, customer-validated time-to-value (3 weeks), schema markup for SoftwareApplication and FAQPage, structured for AI Overview citation.

Bucket 2: Job-to-Be-Done

"automate IT support tickets" | "reduce IT helpdesk volume" | "AI agent for slack IT requests"

Play: Problem-first content that an IT director searches for at 11pm. ROI calculator, Playbook examples, integration list. Captures buyer earlier in the procurement cycle than a competitor query.

Bucket 3: AI-Native Curiosity

"AI agent ITSM" | "LLM IT support automation" | "trainable AI helpdesk"

Play: Technical depth content for the technical buyer. How agents are trained, how access policies are governed, how to wire Console to an existing knowledge base. Builds the AI-credibility moat.

The methodology I have already shipped. Plug Power AEO/GEO program: FAQ pages structured for ChatGPT / Claude / Perplexity citation, content-cluster mapping that mapped to Plug Power's competitive surface in fuel cells, and schema rebuilds that lifted SERP feature capture. The same playbook scales to Console's category. A 2-page enterprise GEO audit teardown (KKR) is available as a portfolio sample on request.

15 Minutes With the Hiring Team

What I would want to understand: which acquisition channel is currently underperforming relative to where the Slack-installed-to-paid funnel needs it to be, how the comparison-page surface is being defended today against ServiceNow and Freshservice content teams that have a 10-year head start, and how the first 90-day operating cadence looks for a Growth Marketer reporting into the founders.

What I would bring to the conversation: a one-page proposal for the first three experiments I would run in week two, a draft "Moveworks alternative" comparison-page brief, and a quick read on which Pixis-trained AI-bidding playbook I would adapt for Console's IT-buyer paid surface.

SF works. Open to relocating from Boston.
