Hiring Team, Conveo,

Conveo is building exactly the product I wish I had had at Sensata. In my current role, I ran 30+ structured customer interviews with OEMs and distributors across EMEA and US. The synthesis was useful, but the bottleneck was always time-to-insight: I would spend a week on logistics, two on interviews, and one on synthesis. Conveo collapses that loop. Marketing the platform to other research-heavy buyers is a job I would take seriously, because I have lived the problem.

What I bring on day one:

- **Customer research as primary skill, not just a side function.** 30+ Sensata interviews translated into product roadmap and positioning that lifted CSAT +22%. I know how research teams actually consume insights, what makes them trust a methodology, and where AI-led interviews still need a human handoff.
- **B2B SaaS AI platform marketing experience.** At Pixis I owned 8 enterprise clients on an AI marketing platform with per-client monthly budgets of \$15K-\$90K. I have done the work of explaining an AI engine to a CFO and getting them to renew.
- **Multi-channel marketing range.** Plug Power -25% CPA across Google + Meta + LinkedIn + programmatic. Coordinated 3 industry conferences and 6+ webinars. Shipped SEO + AEO/GEO programs and email campaigns.
- **AI-native fluency.** Founded SwipeHire on Python + OpenAI API + React (app.swipehire.io). 50+ early users, +25% activation, zero paid budget. I get the AI agent stack you operate in.

I am Boston-based and US-remote works well for the role. London or Antwerp would require relocation - happy to discuss either path.

Looking forward to talking.
