Hiring Team, Marketing Communications, Cummins Inc.

Industrial B2B marketing communications is a translation problem. The buyer is an engineer who is allergic to corporate speak. The channel is LinkedIn plus a technical-forum ecosystem plus a dealer network plus a trade-press loop. The winning communicator is the one who can hold the brand voice while writing in the language the technical buyer actually uses. I have done that motion in industrial sensing, hydrogen energy, and AI adtech.

Three tracks that map to the JD.

Industrial B2B marketing is my current full-time job. At Sensata I lead GTM for new sensing products across NA and EU: email, paid, events, and sales enablement. \$2M+ first-year revenue, +35% qualified leads, +30% win rates through battlecards and decks for 50+ reps. I ran 30+ structured interviews with OEMs and distributors and turned the language those customers actually use into positioning, messaging tests, and content themes that raised CSAT 22%. The industrial technical buyer is who I write for. BE Mechanical Engineering (BITS Pilani) underneath, so I read the product spec first and the marketing brief second.

I have rebuilt a digital media stack from scratch. At Plug Power I evaluated, selected, and implemented Salesforce + Adobe Analytics + Adobe Audience Manager + GA + GTM, trained Sales + Marketing + IT on adoption, and designed closed-loop attribution from ad click to SQL. Email automation, audience segmentation in AAM, and paid campaigns across Google, SA360, Meta, and LinkedIn delivered -25% CPA and +20% conversion. Hydrogen energy is adjacent industrial B2B; the channel and buyer shapes transfer cleanly to Cummins.

I bring AI-augmented workflows as default. I founded SwipeHire, a production AI product on OpenAI API + React (50+ users, +25% activation via 8+ A/B tests). I run a Claude draft-and-critique pipeline for content variants: one Claude call drafts, a second scores, a human gate ships. I hold four Anthropic Claude certifications including Building with the Claude API. Industrial marketers who actually ship with Claude at this depth are rare; in a Cummins transition cycle (AI + electrification + software inside combustion), that fluency compounds.

On the JD specifics. Integrated marketing plan: Sensata GTM (\$2M+ first-year launches). Digital media + email + CMS + paid: Plug Power stack rebuild. Brand management + consistency: 50+ rep enablement at Sensata. SaaS or hardware branding: SwipeHire AI product launch + Pixis AI adtech brand stewardship across 8 clients. Data analysis + business insight: Sensata Power BI exec dashboard on \$627M in opportunities, \$433M margin gaps surfaced for leadership.

On years: posting typically asks for 8+ on Cummins Marcom Manager roles. I have 4+ plus founder experience. Real gap. Scope case over ticker count: stack rebuild, \$1.4M budget, 100+ feature backlog, GTM + enablement at enterprise scale. Worth a screen if scope plus the BE Mech plus sponsor plus Claude stack matters.

MS Marketing Analytics (Simon, Rochester). Committed to relocating to Columbus or Indianapolis.

Resume and portfolio: adhithyabhaskar.vercel.app/ref/cummins

Would welcome 20 minutes on the segment narrative priorities and the first 90-day content roadmap.
