Hiring Team, Growth Marketing, FedEx Dataworks

Foundational growth marketing at a B2B SaaS arm means you build three things at once: the MarTech stack, the experimentation cadence, and the story the market hears. Do one well and ignore the others and nothing compounds. I have run that triple at smaller scale and am built for the next one.

Three tracks that map to the JD.

MarTech stack build, from scratch. At Plug Power I evaluated, selected, and built the Salesforce + Adobe Analytics + Adobe Audience Manager + GA + GTM stack. No infrastructure existed before I arrived. I scoped integrations, trained Sales, Marketing, and IT on adoption, and built closed-loop attribution from ad click to SQL. Paid media across Google, SA360, Meta, and LinkedIn delivered -25% CPA and +20% conversion, with wasted spend down 15%. That playbook transfers to whatever stack Dataworks prefers: HubSpot, Marketo, or a custom build.

Growth ops on an AI B2B SaaS, with a team and a budget. At Pixis I managed an 8-person team and \$1.4M in media across 8 enterprise clients on an AI adtech platform. Weekly optimization cycles, full-funnel restructuring, creative A/B testing, smart bidding. 3x ROAS in 30 days for a leading fashion brand. Client churn down 50%. My job was the translation layer between ML product and customer GTM, which is the exact shape of taking a data/SaaS product to enterprise buyers at Dataworks.

AI tooling in the sales funnel, not just on the marketing team. I founded SwipeHire, a production AI product on OpenAI API + React with 50+ users, 8+ A/B tests, and +25% activation. I run a Claude draft-and-critique pipeline for ad copy and outreach variants: one Claude call drafts five variants per brief, a second scores them against the conversion signal, a human gate approves before push. 8x variant velocity at Pixis-comparable ad volume. I hold four Anthropic Claude certifications including Building with the Claude API. That same pattern scales to SDR outreach, content, and conference follow-up.

Three specifics from the JD:

Build the growth marketing team. Pixis 8-person team plus Sensata cross-functional work across eng, sales, and marketing in 3 regions. Team-build at Sensata scope was +25% release velocity and +30% win rates via enablement for 50+ reps.

Multi-channel campaigns for enterprise pilot programs. Sensata GTM for new sensing products across NA and EU: email + paid + events + enablement; \$2M+ first-year revenue, +35% qualified leads.

Marketing analytics and KPI tracking. Sensata SQL + GA4 KPI framework on 50K+ connected devices, plus a Power BI executive dashboard on 1,200 pricing opportunities (\$627M target, \$433M in margin gaps identified).

On years: posting asks for 5, I have 4+ plus founder experience at SwipeHire. Remote US removes the relocation question. MS Marketing Analytics (Simon, Rochester).

Resume and portfolio: adhithyabhaskar.vercel.app/ref/fedex-dataworks

Would welcome 20 minutes to hear what the first 90-day demand-gen priorities should be.
