Hiring Team, Mirakl

Mirakl sells the marketplace platform that powers Macy's, Saks, Best Buy, Lowe's, and 450+ enterprise brands. The Digital Marketing Manager role sits in Growth Marketing and runs the full multi-channel paid engine across LinkedIn, 6sense Display, Google, Reddit, and Meta, with HubSpot and Salesforce on the MarTech side and explicit AI tooling in the workflow. That is a specific motion, and I have been building toward exactly that shape of work for four years. I am Boston-based and hybrid-ready.

Plug Power, full B2B MarTech rebuild across LinkedIn + SA360 + Google + Meta. I rebuilt the entire stack at Plug Power from scratch: Salesforce + HubSpot + Adobe Analytics + Adobe Audience Manager + GA + GTM. Closed-loop attribution from ad click to SQL. -25% CPA, +20% conversion. Ran account-targeted B2B campaigns across every channel the JD lists (LinkedIn, SA360, Google, Meta, email) for named hydrogen-energy accounts. A/B tested creative, landing pages, and audience segments. When the JD says "determine optimal channel distribution for marketing assets and content," that is the decision I was making weekly, not a new skill to learn.

Pixis, enterprise AI SaaS campaign ownership. I owned an 8-client enterprise book on an AI adtech SaaS with a \$1.4M shared budget across Google, Meta, and programmatic. 3x ROAS in 30 days for a leading fashion brand, -50% churn across the book. Built per-vertical playbooks that Sales used for enterprise expansion. The buyer archetype was measurement-skeptical enterprise CMOs, which is exactly the Mirakl customer type (Macy's digital CMO, Saks marketing leadership, Best Buy merchandising).

Proven history of using AI to optimize campaigns. Four Anthropic Claude certifications including Building with the Claude API. I shipped SwipeHire, a production AI consumer product on OpenAI API and React, solo in six weeks (50+ users, +25% activation, 8+ A/B tests). I run a Claude draft-and-critique content pipeline in production (one Claude call drafts ad copy, a second scores it against brief + brand voice, a human gate ships) for 8x variant velocity at consistent quality. The JD asks for proven AI history; mine is shipped, documented, and load-bearing.

HubSpot + Salesforce + 6Sense readiness. HubSpot is home. I rebuilt the Plug Power stack around it and use it daily. Salesforce was the CRM backbone of that rebuild and of Sensata's ops stack. 6Sense is Salesforce-integrated and runs the same mental model as LinkedIn Campaign Manager account targeting I ran at Plug Power. The ramp is 1-2 weeks, not a quarter. Canva is an afternoon.

ABM muscle. The JD lists ABM as a preferred qualification. Plug Power's B2B hydrogen-energy targeting was ABM in shape if not in label: named accounts, sequenced outreach with BDRs, vertical-specific creative, closed-loop pipeline attribution. Pixis's 8-client enterprise expansion motion is the same pattern at AI SaaS scale. I know the rhythm.

On years. Posting asks 5+; I am at 4+ with founder scope. MarTech rebuild + enterprise AI SaaS book + production AI product = scope case, not ticker case.

Resume and portfolio: adhithyabhaskar.vercel.app/ref/mirakl

Would welcome 20 minutes on the current Mirakl channel priorities and where the biggest pipeline-generation gap is right now across LinkedIn, 6sense, and the rest of the stack.
