Hiring Team, Digital Marketing, Truist Bank

Authenticated digital marketing at a bank is a different problem from acquisition marketing. The audience already trusts you enough to log in. The job is to earn the next action: the cross-sell, the deeper product adoption, the retention moment. That shifts the work from funnel capture to segment relevance, and the winning operator is the one who treats offers, audiences, and personalization as a governed system on the Adobe stack, not a campaign console.

I have built that shape of system at smaller scale.

I rebuilt a full MarTech stack from scratch. At Plug Power I evaluated, selected, and implemented Salesforce for CRM, Adobe Analytics for measurement, Adobe Audience Manager for segmentation and retargeting, GA, and Google Tag Manager. No infrastructure existed before I arrived. I scoped every integration, trained Sales, Marketing, and IT on adoption, and designed closed-loop attribution from ad click to SQL. Paid media on Google, SA360, Meta, and LinkedIn delivered -25% CPA and +20% conversion. The stack transfers cleanly to AEM + Target + CJA on the same Adobe ecosystem.

I run marketing ops as a governed system. At Sensata I own a 100+ feature Agile backlog across 3 regions and 50,000 connected industrial devices. I built the SQL + GA4 KPI framework the product team runs on, and a 4-page Power BI executive dashboard covering 1,200 pricing opportunities worth \$627M. The dashboard enabled leadership to identify \$433M in margin gaps and prioritize recovery actions by salesperson and product line. Same governance muscle banks need for cross-sell analytics.

I think in segmentation and personalization, not mass messaging. At Plug Power I built audience segments in Adobe Audience Manager tied to CRM attributes, and lifted MQL-to-SQL conversion through segment-specific retargeting. At SwipeHire (AI product on OpenAI API + React, 50+ users, +25% activation) I extended this to intent-based personalization: stack + seniority + visa signals drive recommendations rather than demographic averages.

On the JD specifics. Adobe stack: Analytics + AAM direct; AEM, Target, CJA on ramp-up within the same Marketing Cloud data model. Test-and-learn: Plug Power A/B discipline (-25% CPA, +20% conversion), SwipeHire 8+ tests (+25% activation), Sensata CRO raising CSAT 22%. Senior-management KPI reporting: Sensata Power BI dashboard is built for that audience with pipeline funnel, regional scorecards, and weekly decisioning.

On years: posting asks for 7, I have 4+ plus founder experience at SwipeHire. Real gap. Worth a screen if scope and Adobe-stack fluency beat ticker count.

MS Marketing Analytics (Simon, Rochester); BE Mechanical Engineering (BITS Pilani). Committed to relocating to Charlotte.

Resume and portfolio: adhithyabhaskar.vercel.app/ref/truist

Would welcome 20 minutes on where the authenticated funnel has the most headroom and which segments you are prioritizing.
