Hiring Team, Universal Robots / Teradyne Robotics

Universal Robots sells cobots to the same buyer I sell industrial sensors to every day at Sensata: OEM engineers, plant managers, and manufacturing decision-makers. The Paid Campaigns Manager role calls for SEM + Meta + LinkedIn across EMEA and Americas for a B2B/industrial audience, with explicit AI tools in the workflow. That is a specific shape of work, and it overlaps almost perfectly with four years of mine. North Reading is a short commute from Boston for me, which means I can start without relocation friction.

Sensata, industrial B2B as my daily domain. I lead product marketing for new industrial sensor launches at Sensata across NA and EU. 30+ OEM and distributor interviews shaped positioning, battlecards, and case studies for 50+ reps. Paid LinkedIn, email, content, and launch events generated +35% qualified leads and \$2M+ first-year revenue, with win rates up 30%. BE Mechanical Engineering from BITS Pilani means I read the product spec first and the marketing brief second, which is how industrial buyers want to be talked to. The cobot buyer is the sensor buyer with a different budget line; the positioning muscle transfers directly.

Plug Power, full B2B paid stack rebuild. I rebuilt the entire paid + MarTech stack at Plug Power from scratch: Salesforce + HubSpot + Adobe Analytics + Adobe Audience Manager + GA + GTM. I ran LinkedIn, SA360, Google, Meta, and email as an integrated B2B engine for hydrogen-energy decision makers. Closed-loop attribution from ad click to SQL. -25% CPA, +20% conversion. A/B tested creative, landing pages, and audience segments; cut wasted spend 15%. The JD's call for "continuous optimization of paid digital campaigns" is that weekly cadence exactly.

Pixis, multi-client multi-region campaign management at scale. I owned an 8-client enterprise AI SaaS book with a \$1.4M shared budget across Google, Meta, and programmatic. 3x ROAS in 30 days for a leading fashion brand, -50% churn across the book. Ran weekly test-and-learn cycles on creative, audience, and bidding. Built per-vertical playbooks and case-study library that Sales used for expansion pitches. Multi-region campaign coordination, budget trade-offs, and stakeholder reporting were the weekly discipline.

AI tool proficiency, from the builder's side. Four Anthropic Claude certifications including Building with the Claude API. I shipped SwipeHire, a production AI consumer product on OpenAI API and React, solo in six weeks (50+ users, +25% activation via 8+ A/B tests). I run a Claude draft-and-critique content pipeline in production for 8x ad-copy variant velocity at consistent quality. When the JD says "AI tools and automation implementation," that is work I already do, not a skill I need to grow into.

Analytical toolkit. GA4, Power BI, Excel, Sheets, platform-native reporting. MS Marketing Analytics at Simon (Rochester) on causal inference, experiment design, and pricing analytics. SQL daily on 50K+ devices at Sensata. Power BI executive dashboard on \$627M in opportunities, \$433M in margin gaps surfaced for Sales leadership.

On logistics. Boston-based, North Reading is a 25-mile commute, zero relocation. Open to periodic travel to Odense or Munich.

Resume and portfolio: adhithyabhaskar.vercel.app/ref/universal-robots

Would welcome 20 minutes on the current EMEA + Americas paid priorities and where the biggest AI-accelerated optimization gap sits across the campaign book.
