To: Hiring Team, Dyson | **Role:** Revenue Growth Manager, Refurbished Products | **Date:** 2026-05-14

Hiring Team, Dyson,

Refurbished is a margin and lifecycle problem disguised as an inventory problem - and that is the exact shape of work I run every week at Sensata. I architect global pricing for the Industrial BU, decide channel allocation and promotion cadence on live sell-through data, and translate revenue and margin signals into actions that leadership approves. The pairing of premium D2C brand and disciplined refurbished economics is what makes this role interesting to me.

Direct evidence of fit:

- **Revenue and margin growth on a premium category: +12% YoY revenue and +8% market share** for Sensata's Industrial BU via pricing strategy and competitor analysis on **SQL + Power BI + Python**. Influenced AP26 revenue models with senior executives.
- **\$627M margin-recovery executive Power BI dashboard:** Designed and presented a dashboard tracking **1,200 opportunities** across 3 regions, 4 product families, and 20 product lines. Weekly recommendations on price, channel allocation, and promotion - the same operating cadence Refurbished demands.
- **D2C revenue proof on premium consumer brands: 16x ROAS** for a D2C consumer brand at GenY via Google Merchant Center and Meta catalog rebuild, and a **3x ROAS lift** for a fashion D2C partner at Pixis via full-funnel optimization and holdout incrementality testing.
- **Channel and distributor pricing:** Led pricing and channel strategy for Sensata distributors across NA and EU; **\$2M+ first-year revenue** on new lines plus a sales enablement library used by 50+ reps that lifted win rates **+30%**.
- **Customer interviews driving roadmap and positioning:** Ran **30+ structured interviews** with OEMs and distributors; translated voice-of-customer into pricing actions, roadmap, and competitive positioning. CSAT +22%, feature adoption +18% across 50K+ devices.

On qualifications: MS in Marketing Analytics from **Simon Business School (U. of Rochester)**, coursework in **Pricing Policies, Pricing Analytics, and Advanced Pricing**, plus an **Advanced Pricing certification**. Advanced Excel and Power BI are core daily tools at Sensata; cross-functional partnership with Product, Sales, Supply Chain, and Finance is how the global pricing function runs.

I am open to relocating to New York for an on-site role. Looking forward to talking.
