Hiring Team, Fort,

Fort is building a strength-tracking wearable - a consumer hardware + mobile product line where growth depends on getting paid UA right at the install level, getting lifecycle right at the retention level, and getting brand voice right with a fitness-native audience. I have done all three for D2C and consumer-mobile clients before.

Three pieces of my work map directly to Fort:

- **GenY D2C consumer:** 16x ROAS via Google Merchant Center + Meta catalog rebuild for a D2C consumer brand. Klaviyo + Shopify lifecycle (cart abandonment, post-purchase, re-engagement); 2x lift on email-attributed revenue per send.
- **Pixis iOS app paid UA:** Managed iOS UA for consumer-mobile clients on Appsflyer + Adjust + SKAN attribution, Apple Search Ads, Google UAC, Meta App Install. Cohort LTV modeling for budget allocation. 3x ROAS validated for a fashion D2C partner via holdout incrementality.
- **SwipeHire founder marketing:** Founded an AI product on Python + OpenAI + React (app.swipehire.io). 50+ users, +25% activation across 8+ A/B tests, founder-led content driving 60% of signups via referral. Zero paid budget.

Strong fitness/wearable instinct: I am a daily strength trainer and have lived the "track everything, trust nothing, optimize relentlessly" mindset Fort's audience runs on.

SF on-site works. Boston-based, ready to relocate.

Looking forward to talking.
