16x

D2C ROAS AT GENY

Google Merchant + Meta catalog rebuild

\$1.4M

PIXIS PORTFOLIO

iOS paid UA for consumer-mobile clients

2x

KLAVIYO EMAIL LIFT

D2C lifecycle: cart, post-purchase, re-engage

Why Fort gets the right combination of growth experience in one hire

Fort is consumer wearable hardware + mobile + community. Growth needs paid UA at the install level, lifecycle at retention level, and brand voice with a fitness-native audience. I have done all three.

D2C CONSUMER TRACK RECORD

16x ROAS

GenY: Google Merchant + Meta catalog rebuild for a D2C brand. Feed cleanup, schema fixes, weekly creative refresh.

IOS MOBILE UA NATIVE

SKAN-aware

Pixel: iOS paid UA on Appsflyer + Adjust + SKAN attribution, Apple Search Ads, Google UAC, Meta App Install.

LIFECYCLE + RETENTION

Klaviyo Pro

D2C cart abandonment, post-purchase, re-engagement, win-back. 2x email-attributed revenue/send lift.

FORT GROWTH MARKETING LEAD JD NEED

DIRECT EVIDENCE

D2C consumer growth playbook

GenY 16x ROAS. Klaviyo + Shopify lifecycle. Win/loss interviews drove +25% CAC lift.

iOS mobile UA (Appsflyer, Adjust, SKAN)

Pixel: managed iOS UA for consumer-mobile clients. Cohort LTV modeling for budget allocation.

Paid + organic multi-channel

Plug Power: -25% CPA across Google + Meta + LinkedIn + programmatic + email + AEO/GEO.

Founder-led brand voice

SwipeHire: founder-led LinkedIn + X content drove 60% of net-new signups via referral loop.

Data-driven experimentation

SwipeHire +25% activation across 8+ A/B tests. Pixel: 3x ROAS validated via holdout incrementality.

The consumer-wearable playbook I bring

Fort sells to people who track every set, every rep, every PR. That audience is data-loyal but brand-skeptical. The playbook has to respect both.

What I have shipped

- **GenY 16x ROAS D2C:** Google Merchant + Meta catalog rebuild, weekly creative refresh against fatigue cycles. Klaviyo + Shopify lifecycle programs.
- **Pixis iOS UA stack:** Appsflyer + Adjust + SKAN attribution, cohort LTV modeling, Apple Search Ads + Google UAC + Meta App Install creative + bid testing for consumer-mobile clients.
- **SwipeHire founder marketing:** 50+ users, +25% activation, zero paid budget. 5+ landing page variants by ICP. Founder-led content drove 60% of net-new signups.
- **Plug Power multi-channel:** -25% CPA across Google + Meta + LinkedIn + programmatic + email. AEO/GEO so the brand surfaced in ChatGPT/Claude queries.

"I am a daily strength trainer who tracks every set. The Fort audience runs on the same loop I run on - measure, iterate, trust the data."

How I would ramp at Fort

- **Week 1-2:** Audit current install funnel + cohort retention curves. Sit with 5 users in the fitness-native community. Map the 3 highest-friction moments in onboarding to first-PR.
- **Week 3-4:** Ship paid pilot on Apple Search Ads + Meta + TikTok targeting strength athletes. Stand up creator partnership pilot. Document SKAN-era attribution stack.
- **Month 2:** Klaviyo lifecycle redesign tied to in-app behavior. AEO program so Fort shows up when athletes query AI assistants on "best strength tracker."
- **Month 3:** Run holdout incrementality on the first paid channel that works. Document playbook for next hires. Standing weekly rhythm with Product.

Lifecycle expert

Fitness-fluent

My 30 / 60 / 90 at Fort

SF on-site, \$160-250K, 3+ Yrs. Calibrated to consumer wearable seed/Series-A velocity.

30

Days 1-30: Install funnel + cohort retention audit. Sit with 5 strength-native users. Map highest-friction onboarding-to-first-PR moments. Ship 1 paid pilot + 1 creator partnership outreach.

60

Days 31-60: Klaviyo lifecycle redesign tied to in-app behavior. AEO program for fitness queries. Stand up SKAN attribution stack. 2 case studies from power users.

90

Days 61-90: Hold-out incrementality on first paid channel. Owning a measurable install + 30-day retention number. Hand off playbook. Standing weekly rhythm with Product.

The AI-builder + fitness-native angle

Founded **SwipeHire** on **Python + OpenAI + React** (app.swipehire.io). 4 Anthropic Claude certs. I can wire AI agents into Fort's lifecycle for personalized programming nudges and stuck-point prediction.

Plus daily strength trainer. The audience is mine.
