Hiring Team, Fractal,

Fractal's Account Growth Manager role maps almost one-to-one to the work I led at Pixis, where I owned an **8-client enterprise portfolio** and ran **weekly QBRs at CFO and growth-lead level** - expanding wallets, defending renewals, and translating analytics into client decisions. I'm **Boston-based**, so the home-market alignment is direct, and Fractal's blend of AI plus enterprise analytics consulting is exactly where my Sensata pricing work, Pixis CSM portfolio, and my AI builder side (SwipeHire + 4 Anthropic AI certifications) come together.

Direct evidence of fit:

- **Pixis 8-client portfolio, weekly CFO-level QBRs:** Owned strategic account growth across an **8-client enterprise book** with per-client monthly budgets of **\$15K-\$90K**. Ran weekly QBRs with CFOs and growth leads - the closest analog to Fractal's account growth motion.
- **Retention and expansion at Pixis:** Cut client churn **50%** via renewal-aligned playbooks; held **zero account loss** during mid-quarter channel swaps; delivered **3x ROAS** for a D2C fashion partner via holdout incrementality testing.
- **Sensata analytics consulting:** Architecting global pricing on **SQL + Power BI + Python**. Designed and presented a **\$627M margin-recovery executive dashboard** tracking 1,200 opportunities across 3 regions. **+12% YoY revenue, +8% market share**.
- **Multi-stakeholder enterprise engagement:** Led a **4-vendor MarTech RFP at Plug Power** aligning 6 cross-functional partners; ran cross-regional pricing alignment at Sensata across Product, Sales, and Finance.
- **AI consulting credibility:** Founded **SwipeHire** (AI product, shipped solo on Python + AI API + React, 50+ users) and hold **4 Anthropic AI certifications**. I speak the AI-driven analytics language Fractal's Fortune 500 clients are asking for.

On qualifications: MS in Marketing Analytics from **Simon Business School (U. of Rochester)** with coursework in **Pricing Policies, Pricing Analytics, and Advanced Pricing**. Advanced Excel, Power BI, SQL, and Python are core daily tools. I would welcome the chance to walk through how my Pixis CSM playbook scales to a Fractal Fortune 500 account.

Looking forward to talking.
