

PITCH DECK | DIGITAL MARKETING MANAGER | GOOD CULTURE

Show up where the wave is breaking.

Content + social + creator strategy with operator discipline and AI-native storytelling.

5 yrs digital marketing across D2C + B2B SaaS + high-growth brands

SwipeHire - solo AI product, 50+ users acquired through organic Reddit + Twitter

Pixis - 8-person team, \$1.4M aggregate annual book, weekly creative-test cadence

GenY - 16x ROAS on a D2C consumer brand via Shopify + Meta-catalog rebuild

4 Anthropic Claude Certifications + 2 production AI products solo

Adhithya Rokhith Bhaskar

Each line on the left has a working proof on the right.

Six requirements from the role and the LinkedIn post. Six things already shipped. Operator-discipline-plus-storytelling, not slogan.

What the role asks for

"Highly autonomous and ability to make good, insights-backed decisions on the fly."

"A social-first marketer who understands virality, creators, trend cycles, and cutting edge of culture."

"Manage quarterly + monthly content planning and influencer + creator + UGC strategy."

"Own content budget; advise on paid media ROI. Lead agency partners + manage a Marketing Associate."

"Highly organized, diligent, values process as much as creative big-thinking."

"Creativity, AI & Consumer-Centric Storytelling" (from the hiring leader's headline).

What I've actually shipped

SwipeHire solo zero-to-one: Python + OpenAI API + React, day-one GA4 + GTM + Amplitude instrumentation, 8 A/B tests with significance gates up front, weekly cohort retention reviews. The autonomous-shipping pattern with instrumentation.

SwipeHire's first 50+ users came through organic Reddit + Twitter - r/cscareerquestions, r/h1b. Subreddit-native participation first, product surfaced in context after. The "show up where the wave is breaking" reflex in production.

Pixis 8-client portfolio: weekly creative-test cadence across D2C and B2B SaaS books, brand-voice governance across multiple client editorial calendars, creative cycles informed by cohort retention data, not vanity views.

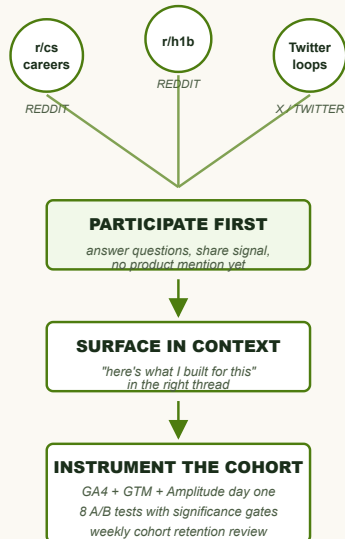

Pixis 8-person team + \$1.4M aggregate annual book + per-client monthly \$15K-\$90K. Plug Power 4-vendor MarTech RFP + 6 internal stakeholders. Budget + agency + first-line people management already operated.

Plug Power UTM spec from zero + GTM containers + SLA docs + Sensata \$627M margin-recovery executive Power BI dashboard across 1,200 opportunities. Process + creative big-thinking is not either/or here.

4 Anthropic Claude certifications + 2 production AI products solo (SwipeHire on OpenAI API + NSE Bot on Claude API) + Cursor + Claude daily. The AI-as-co-pilot-for-storytelling muscle, not deck-only.

SwipeHire: 50+ users acquired through subreddit-native participation.

Two-sided AI matching product shipped solo. The first cohort came from organic Reddit and Twitter loops - not paid, not lookalikes. Show up as a participant first, surface the product in context, let the cohort retention data write the next chapter. The same pattern that the cottage-cheese-as-protein wave is being ridden on, just at smaller scale.

What this teaches a brand-side seat

- 01 Subreddit + niche-channel native participation** beats paid prospecting for the first cohort of a culture wave. The audience can smell a launch from a mile away.
- 02 Trend cycles compound when the brand shows up in the conversation** before the conversation is about the brand. Same shape as the cottage-cheese-as-protein moment.
- 03 Day-one instrumentation** is what separates a creative-test cadence from creative theater. 8 A/B tests with sample-size + significance gates from V1.
- 04 Weekly cohort retention review** drives the roadmap; the creator + UGC asks come second, anchored to what's actually moving the cohort.

50+

first cohort, organic only

significance gates

Day 1

GA4 + GTM + Amplitude

Pixis: 8 brand books, weekly creative cycles, brand-voice governance.

An 8-person team across creative, account, and platform. A \$1.4M aggregate annual book across 8 D2C and B2B SaaS clients with per-client monthly budgets between \$15K and \$90K. Weekly creative-test cadence, weekly client CFO QBRs translating KPIs into pipeline narrative, agency-partner-leadership at portfolio scale.

Client A D2C beauty \$90K/mo META + UGC + CREATOR	Client B D2C apparel \$75K/mo META + TIKTOK-ADJ + SHOPPING	Client C B2B SaaS \$55K/mo LINKEDIN + CONTENT	Client D D2C lifestyle \$40K/mo META + PINTEREST + INFLUENCER
Client E D2C app \$35K/mo META + TIKTOK-ADJ + UA	Client F B2B SaaS \$30K/mo LINKEDIN + PROGRAMMATIC	Client G D2C food \$25K/mo META + UGC + SHOPPING	Client H B2B SaaS \$15K/mo GOOGLE + LINKEDIN
8 person team (creative + account + platform)		\$1.4M aggregate annual book	
3x ROAS D2C beauty (holdout incrementality)		-50% book churn (LTV strategy)	

Operating cadence. Weekly creative-test cycles per client.

Weekly CFO QBRs translating CAC, LTV, ROAS, and payback period into narrative. Brand-voice governance across 8 editorial calendars.

The reflex. Mid-quarter channel swaps on 2 separate clients when blended ROAS hid the truth. Cut weak spend, redirect to true lift, re-pre-flight creative inside 2 weeks. Defended every call to client CFOs.

Why this maps. The DMM seat asks for content + creative + influencer + UGC + agency leadership at high-growth-brand scale. The shape of the Pixis tenure is the shape of the seat.

Three concrete experiments to ship inside thirty days.

Each ships in a month and produces a measurable brand or cohort outcome - not a vanity metric one.

WEEK 1-2 - CULTURE MAP

Cottage-cheese-as-protein cultural-moment audit

Map the conversation currently driving the cottage-cheese wave: which subreddits, which TikTok creators, which Twitter loops, which Substack writers. Score each on velocity, reach, and brand-fit. Output a 2-page culture-map + a list of 25 creators and 10 communities Good Culture should be participating in this quarter.

Why first. The wave is breaking now. The DMM has to know where it lives by the end of week 2 to make any other call. Same audit shape as the SwipeHire community work.

WEEK 2-4 - CREATOR PILOT

10-creator UGC pilot anchored to a single SKU

Pick the SKU with the strongest current cultural pull. Brief 10 creators (mix of micro + nano on TikTok + Reels) with a single editorial angle and creative latitude. Day-one instrumentation: UTM + GA4 + post-purchase survey. Sample-size and significance gates set up front. Output a clean read on which creator archetype actually drives the cohort.

Why first. Earns the influencer + UGC budget by proving it inside 30 days, not in a quarterly plan. Same operator discipline as the Pixis weekly creative-test cadence.

WEEK 3-4 - EDITORIAL CALENDAR

Quarterly content + influencer plan + brand-voice doc

Build the Q3 quarterly content plan + influencer + UGC calendar + a one-page brand-voice doc that the Marketing Associate, the agency partners, and the creators all work from. Process-led big-thinking. Tied to weekly performance reporting + monthly business review cadence.

Why first. Same shape as the Plug Power UTM spec + GTM container governance and the Sensata cross-region brand-voice rollout. Process + creative big-thinking is not either/or.

What I'd want from **the first fifteen minutes.**

What I'd want to understand: which SKU is currently carrying the cultural moment hardest; what the agency + creator partner mix looks like today; and where the team is most blocked on creative velocity right now.

What I'd bring: a draft cottage-cheese-as-protein culture map (subreddits, TikTok creators, Twitter loops, Substack writers), a 10-creator UGC pilot brief scoped to a single SKU, and a one-page brand-voice doc wireframe.

Remote works perfectly. Flexible on Austin visits.

15 min with the team

or written async if that's easier
