

PITCH DECK | FOUNDING GROWTH ENGINEER | GOOSEWORKS

The non-negotiable signal is "lives in Claude Code, built non-trivial agent systems." I do.

Plus two of three named archetype paths simultaneously - that is the differentiator.

4 Anthropic Claude Certifications + Cursor daily workflow

SwipeHire - X-to-Y growth on a product I built (Python + OpenAI + React)

NSE Bot - non-trivial agent system on Python + Claude API

Pixis - 8-client growth-as-a-service portfolio at \$1.4M aggregate book

Plug Power - MarTech rebuilt from zero (-25% CPA, +20% conversion)

Adhithya Rokhith Bhaskar

Boston, MA | Open to SF relo | arokhith@gmail.com | (929) 563-9974 | adhityabhaskar.vercel.app/ref/gooseworks

You named 3 archetypes. I clear 2 of them simultaneously.

Archetype B - AI-native high-output growth IC

"Personally taken a startup X to Y on growth with measurable proof - revenue you personally drove, audience that converts, pipeline sourced + closed through engineered systems."

SwipeHire - shipped solo on Python + OpenAI API + React. Defined ICP, competitor teardown, positioning, GA4 + GTM instrumented from day one, **8 A/B tests with significance gates defined up front, 50+ users acquired via Reddit-organic + Twitter, +25% activation V1 to V2.** Engineered system, audience that converts, real X-to-Y proof.

Reddit-organic acquisition is one of the channels the JD names. SwipeHire was acquired via r/cscareerquestions + r/h1b subreddit-native participation. That is exactly the muscle you would deploy for Gooseworks customers.

Archetype C - AI-native agency operator

"Run growth-as-a-service for multiple companies. Think in systems, not channels."

Pixis 8-client B2B SaaS + D2C portfolio at \$1.4M aggregate annual book, per-client monthly \$15K-\$90K, across Meta + LinkedIn + Google + Criteo + Amazon + programmatic. Weekly client CFO QBRs. **14 months running growth-as-a-service for multiple companies.**

Holdout-incrementality on a D2C beauty client - 2 over-credited channels surfaced, 3x ROAS the next month. **Replaced 2 underperforming channels mid-quarter** on separate clients when blended numbers hid the truth. The "think in systems, not channels" muscle on the budget side.

Trained 8 enterprise marketers on Pixis's AI bidding + creative-automation platform (Smartly / Hunch / Omneky category). Teaching humans to operate AI workflows is half of what a Gooseworks customer experience is.

"Lives in Claude Code, built **non-trivial agent systems**" - cleared cleanly.

Built + shipped

NSE Paper-Trading Bot - Python + Claude API agentic reasoning. Live NSE data scanner with EMA + RSI + ATR technical-indicator pipeline. AI-enhanced reasoning layer for news + catalyst analysis. Automated capital-constraint filtering. Interactive paper-trade dashboard. **Non-trivial agent system.**

SwipeHire - Python + OpenAI API + React. 2-sided AI matching with embedded LLM logic for job-to-candidate fit. GA4 + GTM instrumented from day one. **Production AI product with 50+ users.**

Pixis AI-bidding + creative-automation trainer - taught 8 enterprise marketers on the platform that competes with Smartly + Hunch + Omneky. Lived in the AI bidding workflow before "AI-native marketer" was a category.

Certifications + daily workflow

4 Anthropic Claude Certifications: Claude 101, Claude Code 101, Claude Cowork, Building with Claude API. The full Anthropic stack, certified.

Cursor + Claude daily workflow with a draft-and-critique pipeline I have productized for **8x velocity** on shipping content + decks + outbound assets + landing pages.

When the JD says "you live in Claude Code, built non-trivial agent systems on these" - that is what my last 18 months has actually been. Not "I tried it once."

Plug Power: MarTech **rebuilt from zero**, customer KPI moved.

"Bar: customer hit their KPI, not we shipped the engine." Plug Power is the proof - end-to-end engineered system, measurable outcome.

-25%

CPA

Multi-channel paid + retargeting across Meta + LinkedIn ABM + Google + Adobe programmatic. A/B tested keywords + audiences + creative.

+20%

Conversion

Closed-loop attribution from ad click to SQL on Salesforce + Adobe + GA4 + GTM. UTM spec written from scratch.

6+3

Segments + Suppressions

Account-level retargeting in Adobe Audience Manager (6 behavioral segments + 3 suppression lists). AEO/GEO content cluster for ChatGPT/Claude/Perplexity citation.

This is the engineered-system muscle Gooseworks deploys per customer. For a 3-person founding team selling AI coworkers to GTM engineers, the proof has to be system, not slogan.

What week 1 to week 4 looks like.

WEEK 1

Onboard + Skills Repo

Onboard with cofounders, meet the team.
Contribute 2-3 new skills to the public Gooseworks skills repository on channels I have direct muscle in: Reddit-organic, AEO/GEO content, holdout-incrementality.

Why first: Skills repo contribution is the public signal of "lives in Goose, builds non-trivial agent systems on it."

WEEK 2

Two Engines for Gooseworks Itself

Set up **2 growth engines for Gooseworks**: (1) Reddit-organic acquisition into r/SaaS + r/GrowthHacking + r/startups; (2) AEO/GEO content cluster on "AI coworker for growth" queries on ChatGPT + Claude + Perplexity.

Why these two: Both compound. Both prove the "growth engine for ourselves first" loop the JD names.

WEEKS 3-4

First Customer Engine + Templatize

Pick one of the 50+ paying customers with an uncracked channel. Build the engine end-to-end. **Iterate weekly until the customer hits their KPI.** Templatize the engine into a self-serve playbook in Gooseworks.

Why this fast: The Pixis 8-client cadence trained me to ship + measure + iterate weekly. Same loop, AI-native.

CLOSE

YC W23 + Athina-AI lineage + paying customers + AI-native non-negotiable signal cleared.

You need a Founding Growth Engineer who can run customer growth engines + R&D them into self-serve Goose playbooks. The non-negotiable signal is "lives in Claude Code, built non-trivial agent systems." I clear that with **4 Anthropic Claude certifications + NSE Bot agentic system + SwipeHire AI product + Cursor/Claude daily workflow.**

The differentiator is dual-archetype - I clear **both archetype B (SwipeHire X-to-Y) and archetype C (Pixis 8-client growth-as-a-service)** simultaneously. Plug Power MarTech rebuilt from zero is the engineered-system proof. The 48-hour project will be a growth engine for Gooseworks itself on an uncracked channel, ready to deploy.

SF in-person works. Open to relocation from Boston. LinkedIn note to Sean queued.
