To: Hiring Team, Grindr | **Role:** Senior Product Marketing Manager, Core | **Date:** 2026-05-14

Hiring Team, Grindr,

Core PMM at Grindr is the role I have been training for in public. I ship a consumer AI app solo (**SwipeHire**, app.swipehire.io), I have run iOS paid UA at scale, and I currently run customer-interview-driven product marketing at Sensata. Three lanes the Core PMM role asks for, already running.

Direct evidence of fit:

- **Consumer AI app, shipped solo:** SwipeHire is a zero-to-one AI-native consumer product. **60% of signups from founder-led LinkedIn growth**, weekly retention cohorts, 8+ A/B tests on onboarding and reactivation. I have lived the Core PMM motion as both PM and PMM.
- **iOS paid UA on Appsflyer + Adjust at Pixis:** Ran consumer-app and D2C UA campaigns with per-client budgets **\$15K-\$90K/month**. **3x ROAS lift** for a fashion D2C partner via channel mix + creative refresh; **16x ROAS** for a D2C ecommerce brand at GenY.
- **Lifecycle on Klaviyo and Braze-pattern stacks:** Built welcome series, activation nudges, and dormant-user win-back flows. Iterated weekly on cohort retention curves. Comfortable working acquisition through reactivation as one connected journey.
- **Customer research to product roadmap:** Ran **30+ structured customer interviews** at Sensata; translated VOC into roadmap actions: **feature adoption +18%** across 50K+ devices, **CSAT +22%**. Same insight-to-roadmap motion the JD describes.
- **Cross-functional GTM:** Led launch narratives, positioning, and KPI frameworks for new product lines on **SQL + Power BI + Python**: **+12% YoY revenue**, **+8% market share**, **+30% win rates** via sales enablement.

On qualifications: MS in Marketing Analytics from **Simon Business School (U. of Rochester)** with coursework in Consumer Behavior, Pricing Analytics, and Data Visualization. Strong in SQL, GA4, Amplitude, Figma handoff, and experimentation. Open to San Francisco hybrid. Looking forward to talking.
