What HelloFresh Hires For, What I Have Already Run

HelloFresh JD

- US Paid Search execution across Google + Microsoft Ads (Search, Shopping, PMAX, AI Max)
- Granular optimization across keywords, queries, devices, audiences, geos, landing pages
- Drive CAC + CVR + ROAS + LTV improvements
- Execute global strategy with local rigor across HelloFresh + EveryPlate + Green Chef
- Heavy automation tools and scripts
- Strong quantitative analysis on large datasets in Excel + Sheets + Tableau

Anthropic Claude certifications

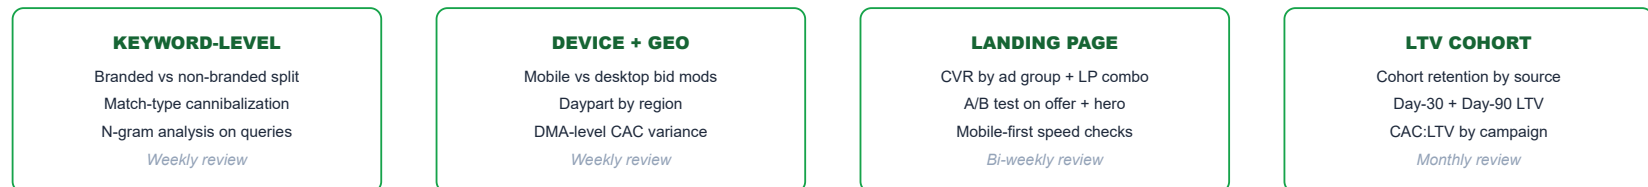

- Google Merchant Center feed architecture rebuild + structured Shopping + Advantage+
- SA360 + Google Ads + Microsoft Ads + Adobe-driven programmatic at Plug Power
- Sensata \$627M Power BI on 1,200 opportunities (Tableau-equivalent depth)

Merchant Center Feed Architecture That Surfaces Weak SKUs

D2C paid search at scale fails when aggregate ROAS hides which SKU is buying the headline number at unit-economic loss. The fix below is the architecture I built at GenY for a 16x ROAS D2C consumer rebuild. Same pattern HelloFresh + EveryPlate + Green Chef can run on Day 30.

The architecture that ties AI Max budget pacing to LTV signals, not 7-day ROAS

Pixis 8-Brand Book, Same Operating Cadence as 3 HelloFresh Brands

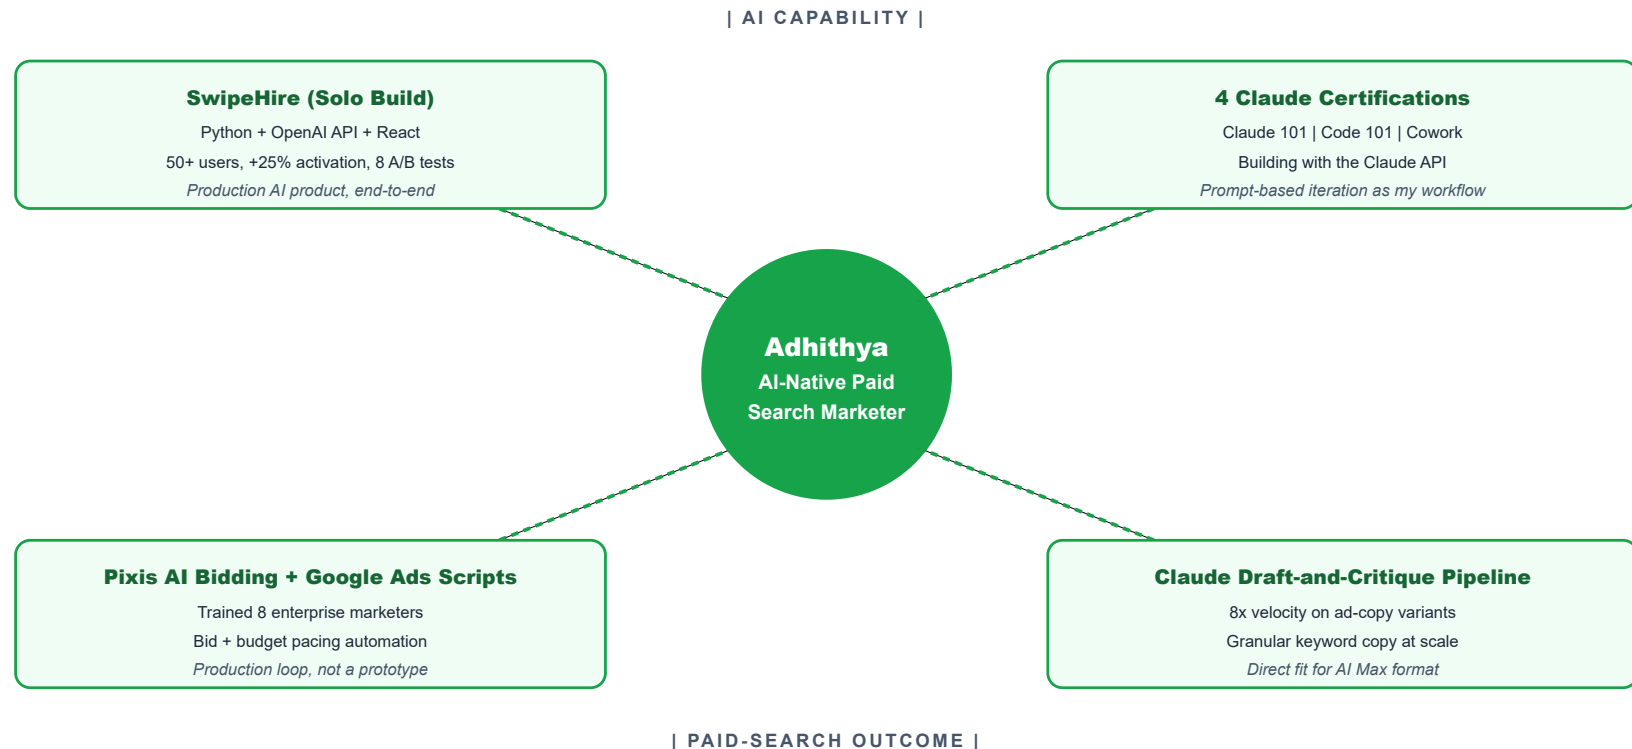

Per-client monthly budgets ranged \$15K to \$90K. Each row was one brand, one weekly QBR, one performance reporting cycle, one set of recommendations. Three brands at HelloFresh is fewer accounts than I have managed in parallel; the operating cadence is built.

Brand	Vertical	Channels	Spend / Mo	ROAS	WoW	Status	This Week's Action
Brand A	Subscription D2C	Google Search + PMAX + Meta Catalog	\$90K	3.4x	+12%	Scale	Holdout incrementality, +30% PMAX budget
Brand B	Premium D2C Food	Google Shopping + Microsoft Ads	\$72K	2.1x	-8%	Refresh	Feed taxonomy rebuild, hero-SKU pivot
Brand C	Lifestyle D2C	Meta Catalog + Google Shopping	\$58K	1.4x	-22%	Replace	Mid-quarter creative reset, Advantage+ test
Brand D	Wellness D2C	Google + Programmatic	\$65K	2.8x	+5%	Hold	Suppression list audit, retargeting refresh
Brand E	Beauty D2C	Meta Advantage+ + Google Shopping	\$45K	4.1x	+18%	Scale	Lookalike expansion, lift campaign
Brand F	Apparel D2C	Meta + Google Shopping + TikTok	\$32K	2.3x	-3%	Diagnose	Top 5% session check, message-to-market test
Brand G	Pet Subscription	Google + Meta	\$22K	2.6x	+9%	Hold	LTV cohort tie-in, lifecycle email handoff
Brand H	Home Goods D2C	Meta + Google Shopping + TikTok	\$15K	3.0x	+7%	Hold	Catalog refresh, Advantage+ test

The diagnostic muscle. On Brand F, blended ROAS looked fine; the top 5% of sessions were carrying the average. Refresh creative, re-key channel mix, retained. Same pattern HelloFresh + EveryPlate + Green Chef will need diagnosed at the SKU level, not the brand level.

Built One AI Product, Productized a Claude Pipeline at 8x Velocity

The JD calls out "leverage automation tools and scripts to increase efficiency." Below: how the four pieces of my AI stack already serve that mandate at production scale.

15 Minutes With the Hiring Team

What I would want to understand: which brand in the portfolio is currently driving the highest CAC volatility week-over-week, how the LTV cohort signal flows back into AI Max budget pacing today, and what the operating cadence looks like across the three-brand book on a typical Monday.

What I would bring to the conversation: a one-page proposal for the first three paid-search experiments I would run in week two, a draft Merchant Center taxonomy review for the highest-spend brand, and a quick read on which Claude pipeline plays would compound fastest given the granular keyword volume across HelloFresh, EveryPlate, and Green Chef.

NYC works. Open to relocating from Boston for the right team.
