Multi-Brand DTC Growth, Already Run at 8-Brand Scale

Idea Village JD

- Own growth across a portfolio of 5 health & wellness DTC brands
- Plan + execute paid social (Meta + TikTok) and paid search (Google)
- Own lifecycle strategy with flows + segmentation
- Build dashboards + weekly performance reports
- Allocate media budgets toward ROAS + CAC goals
- AI tools for marketing efficiency (preferred)

- Productized a Claude draft-and-critique pipeline at 8x copy velocity

Pixis 8-Brand Book, Weekly Per-Brand Decision Rhythm

Per-brand monthly budgets ranged \$15K to \$90K. Each row was one brand, one weekly QBR, one performance reporting cycle, one set of recommendations. Five brands at Idea Village is fewer than I have managed in parallel; the cadence is built.

Brand	Vertical	Channels	Spend / Mo	ROAS	WoW	Status	This Week's Action
Brand A	Wellness Subscription	Meta + TikTok + Google PMAX	\$90K	3.4x	+12%	Scale	Holdout incrementality, +30% PMAX budget
Brand B	Skincare DTC	Meta Catalog + Google Shopping	\$72K	2.1x	-8%	Refresh	Feed taxonomy rebuild, hero-SKU pivot
Brand C	Supplements	Meta + TikTok + Google Search	\$58K	1.4x	-22%	Replace	Mid-quarter creative reset, Advantage+ test
Brand D	Beauty DTC	Meta Advantage+ + Google Shopping	\$65K	2.8x	+5%	Hold	Suppression list audit, lifecycle email tie-in
Brand E	Fitness Subscription	TikTok + Meta + Google	\$45K	4.1x	+18%	Scale	Lookalike expansion, lift campaign
Brand F	Wellness Apparel	Meta + Google Shopping	\$32K	2.3x	-3%	Diagnose	Top 5% session check, message-to-market test
Brand G	Pet Wellness	Meta + Google + Programmatic	\$22K	2.6x	+9%	Hold	LTV cohort tie-in, lifecycle handoff
Brand H	Home Wellness	Meta + Google Shopping + TikTok	\$15K	3.0x	+7%	Hold	Catalog refresh, Advantage+ test

The portfolio decision rhythm. Budget allocation can't be driven by last-week ROAS or the loudest sister brand starves the one with cleanest hero-SKU economics. The cadence above runs per-brand weekly QBRs, per-brand Merchant Center taxonomy, per-brand LTV cohort signals feeding budget pacing, plus a portfolio-level reallocation rhythm. Same shape Idea Village runs.

From Paid Click to Renewal, Already Wired

A health & wellness DTC house wins by treating acquisition, conversion, lifecycle, and retention as one stack with a shared cohort signal, not four siloed teams. Below: the four layers I have already built, and the proof points behind each.

ACQUISITION

Paid social (Meta + TikTok + Advantage+) + Paid search (Google Search + Shopping + PMAx)
Programmatic (Adobe Audience Manager) | Influencer + Affiliate (Pixis exposure)
Plug Power: -25% CPA, +20% conversion across multi-channel paid stack

-25% CPA
+20% CVR
Plug Power

CONVERSION

Google Merchant Center feed architecture | Schema cleanup | Product group split (hero / mid / weak SKUs)
Structured Shopping + Advantage+ catalog | Landing page + offer A/B testing | Negative-keyword discipline
GenY: 16x ROAS for D2C consumer brand via Google Merchant Center + Meta catalog rebuild

16x ROAS
GenY D2C consumer

LIFECYCLE

Email + SMS flows | Behavioral segmentation | Cohort triggers | Onboarding journey design
Account-level segments + retargeting + suppression (Adobe Audience Manager) | MQL/post-purchase nurture
Plug Power: HubSpot drip + nurture + segmentation architected end-to-end

**Architected
End-to-End**
Plug Power

RETENTION

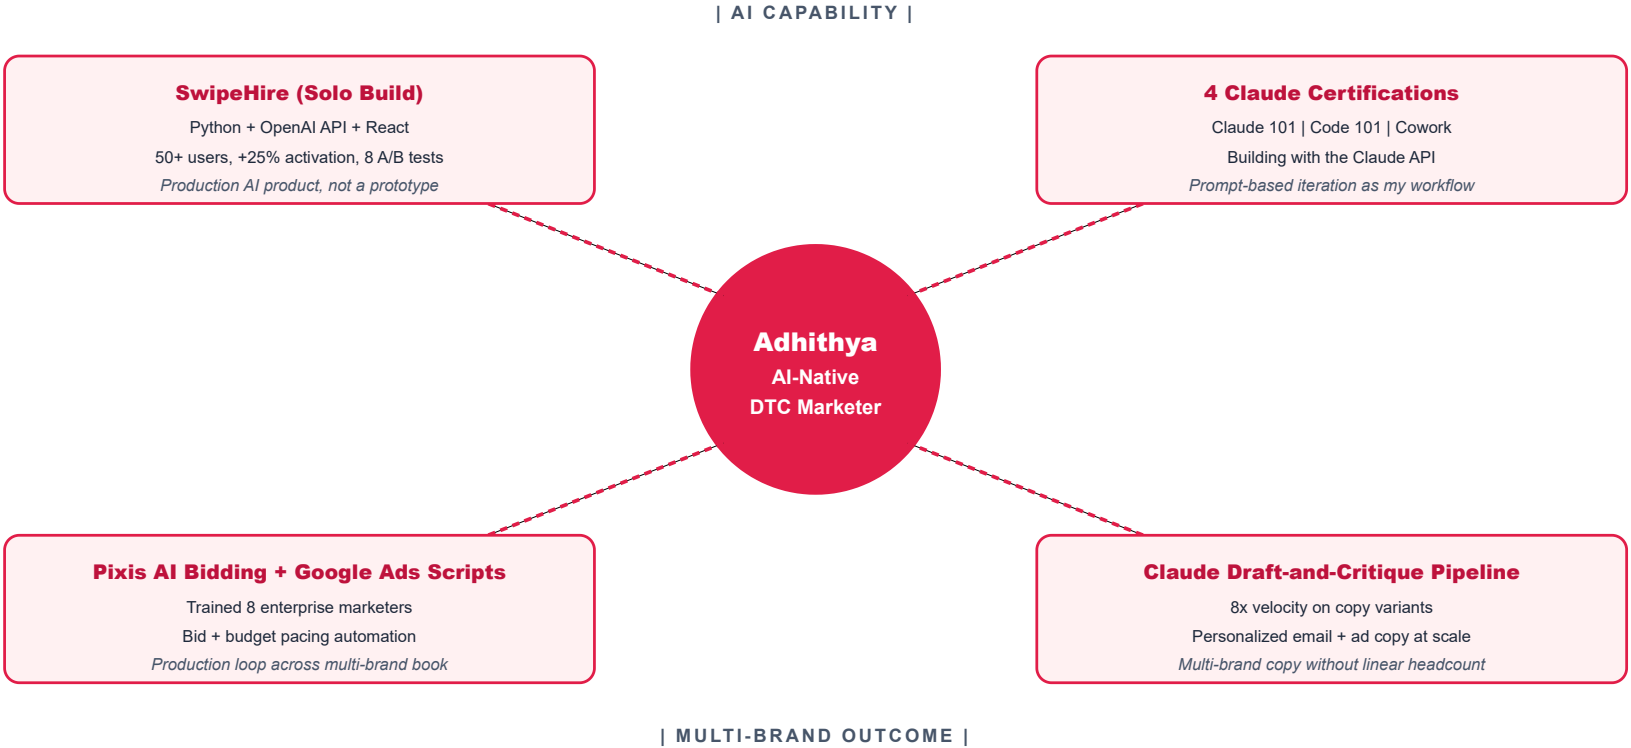

Renewal-aligned playbooks documented per brand | Cohort retention by source | LTV-driven budget pacing
Mid-quarter channel replacement triggers | Holdout incrementality validation
Pixis: cut client churn 50% via per-brand renewal playbooks; 3x ROAS validated via holdout

-50% Churn
3x ROAS Lift
Pixis

All four layers connected by GA4 + GTM closed-loop attribution into a Salesforce / dashboard source-of-truth

Built One AI Product, Productized a Claude Pipeline at 8x Velocity

The JD calls out AI tools knowledge as preferred. Below: how the four pieces of my AI stack already serve a multi-brand DTC mandate at production scale.

15 Minutes With the Hiring Team

What I would want to understand: which brand in the portfolio is currently driving the highest CAC volatility, how the lifecycle handoff between paid acquisition and email + SMS flows works today across the five brands, and what the year-one shape of the team and budget looks like across the portfolio.

What I would bring to the conversation: a one-page proposal for the first three growth experiments I would run in week two, a draft Merchant Center taxonomy review for the highest-spend brand, and a quick read on which Claude pipeline plays would compound fastest given the multi-brand copy volume.

Miami works. Open to relocating from Boston for the right team.
