The "Built, Not Just Used" Job Already Run

What Monstro Hires For

- HubSpot architecture: sequences, pipelines, segmentation, automation - *built, not just used*
- Google Ads + LinkedIn Ads + ABM + IP targeting
- Marketing automation for personalized outreach at scale
- Heavy AI tool fluency for speed and efficiency
- Banking C-suite audience and brand voice
- Bonus: AEO/SEO authority-first contexts, financial services exposure

- Adobe Audience Manager account-level + retargeting + suppression
- SwipeHire shipped solo on Python + OpenAI API + React

Plug Power: MarTech Architected From Zero

UTM spec written from scratch. GTM containers rebuilt. Sequences, pipelines, lifecycle stages, and account-level segmentation architected in HubSpot. Lead routing validated through Salesforce campaign attribution before any cohort number got presented.

The literal "built, not just used" architecture Monstro hires for

HubSpot + Salesforce + Adobe + GA4 + GTM, end-to-end, from zero

+ COORDINATION LAYER

4-vendor MarTech RFP and rollout, 6 internal stakeholders aligned, Procurement terms negotiated, SLA documentation

The same translation work a stealth-stage startup needs from its first marketer

Pixis 8-Client Book, Weekly CFO QBRs

Per-client monthly budgets ranged \$15K to \$90K. Each row is one client, one weekly QBR direct to the client CFO and growth lead. I trained eight enterprise marketers on AI bidding tools as part of those QBRs. The translation work, AI methodology to procurement-ready outcome, is the same translation Monstro will need into a banking C-suite.

Client	Vertical	Channels	Spend / Mo	ROAS	WoW	Status	This Week's CFO Action
Client A	FinTech B2B	Google + LinkedIn + Programmatic	\$90K	3.4x	+12%	Scale	Holdout incrementality, +30% budget approval
Client B	WealthTech	LinkedIn + Programmatic	\$72K	2.1x	-8%	Refresh	Creative cycle reset, audience expansion
Client C	InsureTech	Meta + LinkedIn	\$58K	1.4x	-22%	Replace	Mid-quarter pivot, ABM list rebuild
Client D	SaaS Productivity	Google + Programmatic	\$65K	2.8x	+5%	Hold	Suppression list audit, retargeting refresh
Client E	Compliance SaaS	LinkedIn + Programmatic	\$45K	4.1x	+18%	Scale	ABM list expansion, lift campaign
Client F	Vertical SaaS	Google + Meta	\$32K	2.3x	-3%	Diagnose	Top 5% session check, message-to-market test
Client G	SaaS B2B	LinkedIn + Programmatic	\$22K	2.6x	+9%	Hold	Lookalike expansion, lifecycle email tie-in
Client H	E-Commerce	Meta + Google Shopping	\$15K	3.0x	+7%	Hold	Catalog refresh, Advantage+ test

What I told the CFO who asked. Aggregate ROAS hides the rot. On Client F, blended numbers looked fine; the top 5% of sessions were carrying the average. Refresh creative, re-key channel mix, retained. That kind of CFO-direct diagnostic is the muscle a Monstro buyer will need from its first growth marketer.

Built One AI Product, Productized a Claude Pipeline at 8x Velocity

The JD calls out "heavy user of AI tools for speed and efficiency." Below: how the four pieces of my AI stack already serve the demand-gen mandate at production scale.

15 Minutes With the Hiring Team

What I would want to understand: which segment of the financial-institution buyer is currently driving the most inbound (CIO at a regional bank vs Head of AI at a wealth firm vs compliance lead at an advisory shop), how the prospect-profiling research connects into the HubSpot pipeline today, and what the year-one shape of the team build looks like alongside the parallel Content Manager hire.

What I would bring to the conversation: a one-page proposal for the first three demand-gen experiments I would run in week two, a draft IP-targeting brief for the top 50 wealth-management firms, and a quick read on which AEO/GEO content plays would compound fastest given Monstro's authority-first positioning.

NYC works. Open to relocating from Boston for the right team.
