Hiring Team, NAPA Auto Parts,

The Jobber Pricing Manager role is a direct continuation of the work I am currently doing at Sensata. I architect global pricing strategy for the Industrial BU - running deep-dive profitability reviews for OEMs and distributors, translating data into defensible pricing recommendations, and partnering with field sales and senior leadership to land changes that influence revenue and margin.

Direct evidence of fit:

- **Sensata pricing architect:** Built and run global pricing on **SQL + Power BI + Python** models. **+12% YoY revenue, +8% market share** via competitor and customer analysis across EMEA and US. Influenced AP26 revenue models with senior executives.
- **\$627M margin-recovery executive Power BI dashboard:** Designed and presented a dashboard tracking **1,200 opportunities** across 3 regions, 4 product families, and 20 product lines. Surfaced pricing actions to leadership weekly.
- **30+ structured customer interviews** with OEMs and distributors translating insights into pricing actions and competitive positioning - the same consultative business-review work the Jobber Pricing role describes. CSAT +22%, feature adoption +18% across 50K+ devices.
- **Sales enablement library used by 50+ reps** that lifted win rates **+30%**. Built credibility with technically deep, skeptical buyers (industrial OEMs) - the same shape as NAPA's independent store owners.
- **Pixis multi-client portfolio:** Managed an 8-client B2B SaaS portfolio with weekly QBRs at the CFO level. Identified profitability inefficiencies; cut churn 50% via documented playbooks.

On qualifications: I hold an MS in Marketing Analytics from **Simon Business School (U. of Rochester)** with coursework in **Pricing Policies, Pricing Analytics, and Advanced Pricing**; plus an **Advanced Pricing certification**. Advanced Excel and Power BI are core daily tools at Sensata.

I am Boston-based and open to relocating to Atlanta. Looking forward to talking.
