Hiring Team, Naïve,

The "build the system that produces content, ranks it, attributes it, and compounds" framing in your JD is exactly how I built SwipeHire. I am a growth marketer who codes - which is the rare profile a Naïve Growth Engineer role wants.

Direct proof:

- **SwipeHire (founded solo):** Built end-to-end on **Python + OpenAI API + React**: scraper that ingests JDs, LLM rewrites mapping resumes to each JD, ranking layer weighting responsibility match over keyword match, retention dashboards written from scratch. **50+ users, +25% activation across 8+ A/B tests, zero paid budget.**
- **Plug Power AEO/GEO live:** Shipped programmatic SEO + Answer Engine Optimization programs so the brand surfaced in ChatGPT and Claude buyer queries. Wrote UTM spec from scratch + rebuilt GTM containers. -25% CPA, +20% conversion across paid channels.
- **Pixis Codex CSM:** Trained 8 enterprise teams on Pixis Codex (RL-based cross-channel bid optimization), generative creative variant testing, pLTV-weighted pacing. So I understand how AI growth engines actually work under the hood.
- **GenY D2C:** 16x ROAS via Google Merchant + Meta catalog rebuild. I have moved a metric, not just managed an agency.

I will also send a LinkedIn connection note your way per the JD. Boston-based, remote or relo to SF both work.

Looking forward to talking.
