Hiring Team, Newform

The Growth Marketing Manager JD asks for someone who can run a multi-client agency-side book at scale across Meta + TikTok + Google with iOS app expertise, AND understand AI-agent product DNA well enough to talk credibly about WillBot. That convergence is rare. Pixis is my agency analog and SwipeHire is my AI-product analog, and I have both, shipped.

Pixis is the closest agency-shape on any candidate's CV you'll see. I ran an 8-client B2B SaaS portfolio with a \$1.4M aggregate annual media book, per-client monthly budgets between \$15K and \$90K, spread across Meta, Google, LinkedIn, Criteo retail-media, Amazon Ads, and programmatic. I owned iOS app paid UA via Appsflyer and Adjust on the book, including SKAN and post-IDFA conversion-event configuration. I led an 8-person team across creative, account, and platform specialists. Weekly client CFO QBRs translating analytics into procurement-ready outcomes. Trained eight enterprise marketers on AI bidding and creative tools as part of those QBRs. The translation work, AI methodology to CFO-readable outcome, is exactly the muscle Newform's senior client relationships will need.

On the AI-product side, SwipeHire is my answer. Built solo on Python + OpenAI API + React, with GA4 + GTM + Amplitude wired day one, 8 A/B tests on activation flows, +25% activation lift V1 to V2. Different domain than WillBot, structurally the same product: deterministic input layer + LLM reasoning + measured user outcome. Plus four Anthropic Claude certifications and Cursor as my daily workflow.

On D2C consumer + creative cadence, GenY 16x ROAS work was rebuilding Google Merchant Center and Meta catalog feeds on Shopify with weekly creative-test discipline. Plug Power closed-loop attribution rebuilt from zero on HubSpot + Salesforce + Adobe + GA4 + GTM, -25% CPA, +20% conversion.

Restructured attribution for a leading beauty brand at Pixis via holdout-incrementality slices that exposed two over-credited channels; reallocated spend on true lift, brand cleared 3x ROAS the next month. That's the diagnostic muscle the JD's "scalability and efficiency" line is really asking for.

Attaching my resume and a 6-slide pitch deck mapping these proofs to the JD line-by-line, plus three specific 30-day experiments I'd run on Newform's client book. Full portfolio is at adhi-growth-ai.vercel.app/ref/newform.

NYC works; open to relocating from Boston. Looking forward to a conversation.
