CPA at Plug Power

16x

ROAS at GenY D2C

- Weekly client QBRs to CFOs and growth leads
- Trained 8 enterprise marketers on AI bidding tools
- 4 Claude certifications + SwipeHire on OpenAI API

Pixis 8-Client Book, Weekly QBR View

The shape of the Pixis book matches the shape of Newform's account portfolio. Per-client monthly budgets ranged \$15K to \$90K. Each row is one client, one weekly QBR, one set of recommendations. Two clients triggered mid-quarter channel replacement.

Client	Vertical	Channels	Spend / Mo	ROAS	WoW Trend	Status	This Week's Action
Client A	Fashion D2C	Meta + Google Shopping	\$90K	3.4x	+12%	Scale	Holdout incrementality test, +30% budget
Client B	SaaS Productivity	Google + LinkedIn	\$72K	2.1x	-8%	Refresh	New creative cycle, audience expansion
Client C	Health & Wellness	Meta + TikTok	\$58K	1.4x	-22%	Replace	Mid-quarter pivot off TikTok to Meta Advantage+
Client D	FinTech B2B	Google + LinkedIn + Programmatic	\$65K	2.8x	+5%	Hold	Suppression list audit, retargeting refresh
Client E	Edu D2C	Meta + Google Search	\$45K	4.1x	+18%	Scale	Lookalike expansion, lift campaign
Client F	Consumer App	Meta + Google UAC	\$32K	2.3x	-3%	Diagnose	Creative-fatigue audit, top 5% session check
Client G	SaaS Vertical	LinkedIn + Programmatic	\$22K	2.6x	+9%	Hold	ABM list expansion, targeting refresh
Client H	E-Commerce	Meta + Google Shopping + TikTok	\$15K	3.0x	+7%	Hold	Catalog refresh, Advantage+ test

The diagnostic muscle. Aggregate ROAS hides the rot. On Client F, blended ROAS looked fine; the top 5% of sessions were carrying the average. Refresh creative + re-key channel mix, retained. That is the pattern Newform's media buyers and creative strategists need from a manager.

3x ROAS Lift Validated via Holdout Incrementality

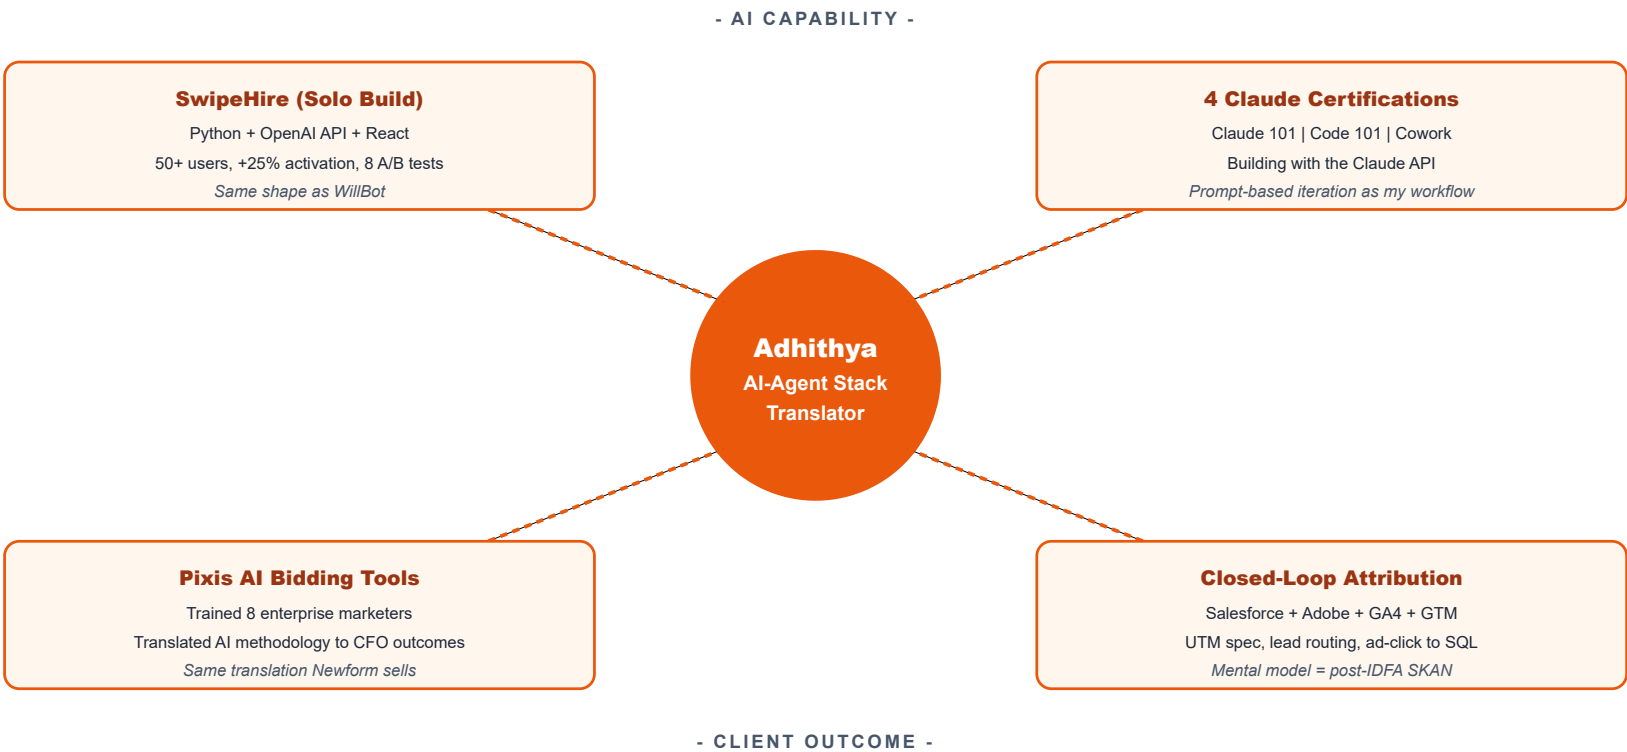

Pixis client, fashion D2C. Geo-holdout split, 4-week lift window, weekly readouts presented to client CFO.

What I told the client CFO. The 3x lift held up under holdout. Aggregate ROAS would have shown 2.4x and called it a win. The honest number is the one that survives a control group, and the one the client renews on.

WillBot Fluency, Already Earned

Newform sells AI-enabled performance marketing. The translation muscle from AI capability to client outcome is the same translation I have been doing for two years. Hub view of how the pieces connect.

15 Minutes With the Hiring Team

What I would want to understand: which of the iOS-app clients most resemble what I would inherit, how creative briefs flow between WillBot and the strategist team in practice, and what the first 90-day operating cadence looks like for a new manager on the book.

What I would bring to the conversation: the exact playbook I ran on Pixis Client F when blended ROAS hid creative-fatigue rot, plus a one-page proposal for how I would structure the first weekly QBR template if I joined.

iOS app paid UA is direct. I ran Appsflyer and Adjust at Pixis as part of the 8-client book with SKAN / post-IDFA conversion-event discipline. NYC works. Open to relocating from Boston.

15-Minute Founder Screen
