Hiring Team, Nielsen,

The Strategic Growth Manager, Analytics role lines up with how I already spend my week: consulting enterprise clients on measurement and analytics, translating audience and attribution data into growth actions, and earning credibility with senior stakeholders who don't have time for hand-waving. At Sensata I architect global pricing and analytics on SQL + Power BI + Python; at Pixis I ran an 8-client B2B SaaS portfolio with weekly QBRs at the CFO level. Both jobs were the same shape Nielsen's growth-manager role describes - own the relationship, own the analytics, grow the account.

Direct evidence of fit:

- **Sensata global analytics and growth strategy:** SQL + Power BI + Python models driving **+12% YoY revenue**, **+8% market share**, and a **\$627M margin-recovery executive dashboard** tracking **1,200 opportunities** across 3 regions and 4 product families. Translated data into weekly growth recommendations for senior executives.
- **Pixis 8-client B2B SaaS portfolio:** Ran **weekly QBRs with CFOs and growth leads**; per-client monthly budgets of **\$15K-\$90K**. Reframed **attribution drift**, cohort LTV, and channel mix into stakeholder-ready plans; cut **client churn 50%** via documented playbooks.
- **Measurement and incrementality:** Validated **3x ROAS lift** for a fashion D2C partner via **holdout incrementality testing** across Amazon, Criteo, Meta, and Appsflyer/Adjust mobile UA - the same measurement craft Nielsen sells to brand and agency clients.
- **30+ customer interviews** with OEMs and distributors at Sensata; reframed attribution and feature-adoption gaps into pricing and product actions. CSAT +22%, feature adoption +18% across 50K+ devices.
- **Cross-functional analytical rigor:** Cross-regional alignment with **Product, Sales, and Finance** at Sensata; executive-facing Adobe Analytics + Power BI reporting at Plug Power; market research and competitive analysis across product families at both.

On qualifications: I hold an MS in Marketing Analytics from **Simon Business School (U. of Rochester)** with coursework in **Pricing Analytics, Consumer Behavior, and Data Management and Visualization**. Advanced Excel, Power BI, SQL, and Python are core daily tools, and I'm comfortable across GA4, Adobe Analytics, Adobe Audience Manager, and the wider measurement stack.

I'm Boston-based and ready to be on-site in New York. Looking forward to talking.
