The Loop the JD Describes Is the Loop I Run

Nielsen JD

- Full-funnel digital campaigns across awareness + engagement + conversion
- Multi-touch attribution across channels
- Real-time underperformance diagnosis + strategy adjustments
- Translate metrics into executive narratives with actionable recommendations
- A/B testing frameworks for creative + LP + audience segments
- GA4 + platform-native (Meta + Google + LinkedIn) + pixel/tag/tracking integrity

What I Have Already Run

+25%

Activation lift on SwipeHire

- UTM spec from scratch + GTM containers rebuilt + GA4 events validated
- Closed-loop attribution from ad click to SQL on HubSpot + Salesforce + Adobe
- Pixis weekly CFO QBRs across 8-client B2B SaaS book

Plug Power: Ad Click to SQL, One Source of Truth

UTM spec written from scratch. GTM containers rebuilt. GA4 events validated end-to-end. Lead routing reconciled through Salesforce campaign attribution before any cohort number got presented. Pixel and tag hygiene was the foundation, not an afterthought.

"Translate metrics into actionable executive narratives" (verbatim from JD) starts here

Pixis Weekly CFO QBR + Sensata \$627M Dashboard

The JD's "translate metrics into actionable executive narratives" line is operational at two scales in my CV. Below: the four narrative artifacts I have shipped repeatedly to executive audiences with the actionable recommendations attached.

Pixis Weekly CFO QBR

8

Clients, weekly cadence

ROI + iROAS presented to client CFOs and growth leads. Each QBR ended with three concrete next-week actions the CFO signed off on. Replaced two underperforming channels mid-quarter when KPIs slipped.

Sensata Margin Dashboard

\$627M

Margin recovery scope

Power BI dashboard tracking 1,200 opportunities across 3 regions, 4 product families, 20 product lines. Designed for executive review cadence. Translated dense device-level data into commercial decisions.

Customer-Story Pipeline

+30%

Win rate lift, 50+ reps

30+ structured customer interviews + win/loss synthesis fed sales enablement library (decks + cases + battlecards + FAQs). Sensata. Each artifact built for a specific deal-review moment.

4-Vendor MarTech RFP

6

Stakeholders aligned

Plug Power. Coordinated Sales + IT + Marketing + Procurement on tooling consolidation. Negotiated terms, documented SLAs, presented options to leadership with recommendation attached.

The narrative discipline that travels. Executive narrative is not "summarize the dashboard." It is "here is what changed, here is why, here is what I would do about it, here is the one thing you should approve this week." Same shape Nielsen needs from a Digital Campaign Manager translating multi-touch attribution into action.

From Solo Consumer-AI Build to 8-Client Agency Holdouts

The JD calls out "design and lead A/B testing frameworks for creative, landing pages, and audience segments." Below: how the four pieces of my testing-rigor stack already serve that mandate at production scale across three operating contexts.

15 Minutes With the Hiring Team

What I would want to understand: which channel mix is currently driving the most attribution disagreement between the platform-native dashboards and the multi-touch model, how the executive review cadence runs today and which audience the narrative needs to land for, and what the year-one shape of the campaign team looks like.

What I would bring to the conversation: a one-page proposal for the first three full-funnel campaigns I would run in week two, a draft multi-touch attribution audit framework, and a quick read on where the A/B testing roadmap should compound first given the buyer-journey complexity.

Remote works cleanly.
