Hiring Team, Omada Health,

Member enrollment and retention for a digital health platform is exactly the shape of work I have been running end-to-end for the last four years across D2C consumer brands and B2B SaaS. I have built acquisition funnels that hit **-25% CPA and +20% conversion**, lifecycle programs that drove repeat purchase, and cohort retention work that cut churn in half - the same playbook Omada needs to enroll, activate, and retain members at scale.

Direct evidence of fit:

- **Multi-channel consumer acquisition (Plug Power):** Ran Google, Meta, LinkedIn, and programmatic with audience segmentation and creative A/B testing. **-25% CPA and +20% conversion**. Built closed-loop attribution on HubSpot + Salesforce + Adobe + GA4 + GTM so CAC and LTV were visible by segment.
- **D2C consumer growth and Klaviyo lifecycle (GenY Medium):** Owned end-to-end D2C consumer enrollment - rebuilt Google Merchant + Meta catalogs for **16x ROAS** and a **+36% conversion rate** lift, then ran Klaviyo welcome, abandoned-cart, and win-back flows with cohort segmentation to lift repeat purchase and **+25% acquisition**.
- **Cohort retention and churn (Pixis):** Managed an 8-client D2C portfolio on per-client budgets of **\$15K-\$90K/month**; ran cohort LTV and attribution analysis and **cut churn 50%** with documented renewal-aligned playbooks and channel diversification.
- **Onboarding A/B testing and activation (SwipeHire):** Shipped an AI-driven consumer product solo on Python + React; instrumented GA4 + GTM + Amplitude and ran **8+ onboarding A/B tests that lifted activation +25%** with weekly retention cohorts informing the next iteration.
- **Client-facing growth consultation:** 30+ structured Voice-of-Customer interviews translating segment insights into enrollment and retention actions; weekly QBRs with growth leads and CFOs; sales enablement library used by 50+ reps that lifted win rates **+30%**.

On qualifications: I hold an MS in Marketing Analytics from **Simon Business School (U. of Rochester)** with coursework in Consumer Behavior, Pricing Analytics, and Data Visualization. GA4, SQL, Tableau, Klaviyo, HubSpot, and Salesforce are core daily tools. Boston-based and fully comfortable remote-first.

I would love to talk about how I would build Omada's next member-enrollment cohort.
