Hiring Team, Otter.ai,

Paid acquisition for an AI product is the work I want to do, and the work I am already doing on the side. I have shipped an AI product end-to-end and run paid for B2B SaaS portfolios - so I can step into the funnel from both the builder's chair and the buyer's chair. Otter sits at the exact crossover I am chasing: AI utility with a B2B SaaS motion and a consumer pull-through.

Direct evidence of fit:

- **Plug Power paid acquisition lead:** Owned multi-channel paid (Paid Search, Paid Social, Programmatic). 40+ A/B tests on creative, bid strategy, and audience: **-25% CPA, +20% conversion**. Stood up **closed-loop attribution from ad click to SQL** on HubSpot + Salesforce + Adobe + GA4 + GTM.
- **Pixis B2B SaaS portfolio:** Ran an **8-client** book with per-client monthly budgets of **\$15K-\$90K**. iOS paid UA on **Appsflyer + Adjust** (Apple Search Ads, Meta, TikTok app installs, SKAdNetwork bid management). **3x ROAS** in one month for a fashion brand via holdout incrementality; churn cut **50%**.
- **SwipeHire (shipped AI product):** Built on **Python + AI + React** at app.swipehire.io. 50+ users, zero paid budget, full GA4 + Amplitude instrumentation, 8+ A/B tests on activation. I understand the AI-product growth loop from inside the codebase.
- **Lifecycle and retention at GenY:** Klaviyo flows, segmented A/B tests, win-back automations. **16x ROAS** on a D2C brand; +25% repeat-purchase rate. Paid acquisition that does not respect retention is wasted budget - I run both sides.
- **Analytics instrumentation: SQL + Power BI + GA4 + GTM** are daily tools. I have built executive dashboards (Sensata: \$627M margin recovery, 1,200 opportunities) and CAC payback models that drive real reallocation decisions.

On qualifications: MS in Marketing Analytics from **Simon Business School (U. of Rochester)**; Google Search and Shopping, SA360, Criteo, HubSpot certifications. Boston-based and open to relocating to Mountain View for on-site. Looking forward to talking.
