Hiring Team, Overview,

Overview is "reshaping industrial quality with AI, hardware, and software" - and you sell to industrial manufacturing and quality leaders who are technically deep, conservative about new tools, and skeptical of AI replacing their domain judgment. That is exactly the buyer I have been building marketing for at Sensata for the last 18 months, on a precision-sensor product line that those same buyers depend on.

The work translates 1:1:

- **Translate technical product into VP-ready narrative.** At Sensata I lead product marketing for the Industrial BU - capacitive, pressure, and MEMS sensor architecture - and turn it into positioning, sales enablement, and content for OEMs and distributors. **Sales enablement library used by 50+ reps lifted win rates 30%.**
- **Customer research to drive product narrative.** 30+ structured customer interviews across EMEA and US. Insights drove product roadmap, lifted CSAT +22%, and lifted feature adoption +18% across 50K+ connected devices.
- **GTM for new technical products.** \$2M+ first-year revenue across NA and EU for new sensing product lines via positioning, channel strategy, and product launch content.
- **Multi-channel distribution.** Plug Power MarTech rebuild: -25% CPA across Google + Meta + LinkedIn + programmatic. Coordinated 3 industry conferences and 6+ webinars. Shipped SEO + AEO/GEO programs.

And on the AI side: I founded SwipeHire on Python + OpenAI API + React (app.swipehire.io). 50+ early users, +25% activation across 8+ A/B tests, zero paid budget. So I can read Overview's tech docs as a builder, not just a marketer.

I am Boston-based; the SF / Remote (US) setup works well.

Looking forward to talking.
