

Overview's buyer is **my** **buyer.** **Industrial. Technical.** **Skeptical of AI.**

18 months at Sensata translating sensor architecture into VP-ready narrative for OEMs and distributors. Plus I have shipped my own AI product on Python + OpenAI + React.

Adhithya Rokhith Bhaskar · Technical PMM Pitch Deck

30+

INDUSTRIAL CUSTOMER INTERVIEWS

Sensata OEMs + distributors, EMEA + US

+30%

WIN RATE LIFT

Sales enablement library used by 50+ reps

\$2M+

NEW PRODUCT GTM

First-year revenue across NA + EU

Why Sensata maps 1:1 to Overview's buyer

Industrial manufacturing leaders. Quality engineers. Conservative about new tools. Skeptical of AI replacing domain judgment. Read tech specs before they read marketing copy. This is the Sensata buyer.

AUDIENCE MATCH

B2B Industrial

Sensata: sensor product line sold to industrial OEMs and distributors. Plug Power: industrial hydrogen energy MarTech. Same buyer shape as Overview.

TRANSLATION SKILL

Tech → VP

Translated capacitive/pressure/MEMS sensor architecture into VP-ready positioning. Sales enablement library lifted win rates 30%.

AI BUILDER CRED

4 Claude Certs

SwipeHire on Python + OpenAI + React. Can read Overview's tech docs as a builder, not just a marketer.

OVERVIEW TECHNICAL PMM NEED	DIRECT EVIDENCE
Translate technical product into compelling narrative	Sensata: sensor architecture → VP-ready positioning, sales enablement library, win rates +30%.
Customer research drives messaging	Sensata: 30+ structured customer interviews; insights drove product roadmap and lifted CSAT +22%.
Build multi-modal content (case studies, demos, launches)	Sensata: \$2M+ GTM via product launch content. Plug Power: case studies, long-form, 3 conferences + 6 webinars.
Cross-functional with Product, Sales, Engineering	Sensata: weekly cadence with Product, Sales, and Eng on roadmap, positioning, and pricing.
Read tech docs natively	Founded SwipeHire on Python + OpenAI API + React. BE Mechanical Engineering at BITS. MS Marketing Analytics at Simon.

The Sensata-to-Overview translation

Same shape, different category. Both sell technical products to industrial leaders who only adopt new tools they can defend internally.

What I have shipped for the industrial buyer

- **Sensor architecture → VP narrative:** translated capacitive, pressure, MEMS sensor specs into positioning, sales decks, and objection-handling talk tracks for 50+ reps
- **30+ structured interviews** with OEMs and distributors across EMEA and US; voice-of-customer drove product roadmap (+22% CSAT, +18% feature adoption across 50K+ devices)
- **\$2M+ first-year GTM** on new sensing products across NA and EU via positioning, channel strategy, and product launch content
- **\$627M margin-recovery executive dashboard** tracking 1,200 opportunities across 3 regions, 4 product families, 20 product lines

"The Overview buyer trusts evidence over rhetoric. I have spent 18 months building positioning that respects that bar."

How I would ramp Overview's PMM function

- **Interview 5 current customers** in week 1: capture their internal narrative, decision criteria, and AI skepticism
- **Audit current sales enablement:** identify gaps for the technical-VP and quality-engineer personas
- **Ship 3 case studies** by end of month 2, each anchored to a single hero metric (e.g., defect rate -X%, audit hours -Y%)
- **Build a "Overview vs. status quo" comparison page** for ChatGPT/Claude AEO/GEO discovery
- **Stand up a weekly product-marketing cadence** with Eng + Product + Sales

Translates tech

Research-driven

Multi-modal

Cross-functional

My 30 / 60 / 90 at Overview

SF or US-remote. Calibrated to Overview's industrial-AI buyer and seed/Series-A velocity.

30

Days 1-30: Sit with 5 customers + product + 2 sales reps. Read 6 months of customer conversations. Map 3 buyer personas (Quality Director, Manufacturing Engineering Lead, COO at mid-market manufacturer). Audit current positioning.

60

Days 31-60: Ship 3 case studies. Build a sales enablement library (objection handling, demo scripts, ROI calculator). Run a paid pilot on LinkedIn targeting manufacturing leaders. Ship 1 product launch with full content stack.

90

Days 61-90: Own the inbound number. Have AEO/GEO programs live so Overview shows up when buyers query AI assistants. Standing weekly product-marketing rhythm with Eng + Product + Sales. Hand off documented playbooks.

Why AI builder matters here

Overview is industrial AI. The PMM has to think like an engineer when talking to engineers. I founded **SwipeHire** on **Python + OpenAI API + React** (app.swipehire.io). I can read your model docs natively.

Plus 4 Anthropic Claude certifications. BE Mechanical Engineering. MS Marketing Analytics from Simon.
