To: Hiring Team, Samsara | **Role:** Sr. Growth Marketing Manager - New Products | **Date:** 2026-05-14

Hiring Team, Samsara,

The New Products growth role is a near-direct continuation of the work I run today at Sensata's Industrial BU - the same buyer profile Samsara serves: industrial OEMs, fleet operators, distributors, and the technical decision-makers who actually deploy sensors and connected systems in the field. I have spent the last two years designing 0-to-1 launches into that exact audience, instrumenting the funnel end-to-end, and partnering with sales and product to land measurable revenue against new offerings.

Direct evidence of fit:

- **New product GTM for industrial/fleet buyers:** Ran GTM for new sensing product lines across NA and EU - **\$2M+ first-year revenue** via integrated launch motion (paid, email, webinars), channel strategy, and sales partnership. The same 0-to-1, demand-gen-for-new-offerings shape this role describes.
- **Multi-channel paid + closed-loop attribution at Plug Power (industrial energy):** Rebuilt the stack on HubSpot + Salesforce + Adobe + GA4. **-25% CPA, +20% conversion** across Paid Search, Paid Social, and Programmatic - selling into fleet operators, energy ops, and heavy-equipment OEMs.
- **Experiment-driven growth:** SQL + Python + Power BI fluent. Defined test plans, reporting cadences, and instrumentation across regions at Sensata; ran 8+ A/B tests on a personal side project. Strong analytical rigor on experiment design and turning insight into action.
- **Sales enablement for technical buyers:** Library used by **50+ reps** that lifted win rates **+30%**. Built credibility with deeply technical, skeptical industrial buyers - the shape of Samsara's customer base.
- **Customer-led roadmap: 30+ structured customer interviews** with OEMs and distributors drove product roadmap, positioning, and lifecycle motions. CSAT +22%, feature adoption +18% across 50K+ industrial devices.

On qualifications: MS in Marketing Analytics from **Simon Business School (U. of Rochester)**, advanced SQL and Python, and daily Power BI use. Comfortable in a startup-within-an-enterprise context - that is exactly the new-product motion I run at Sensata today.

I am Boston-based, fully open to remote, and looking forward to talking.
