Hiring Team, Sarvam,

"Own everything from the first touchpoint to an activated user" is the charter I have been running solo on **SwipeHire** for the last 18 months. Built it end-to-end on **Python + OpenAI API + React**, instrumented **GA4 + GTM + event tracking** from day one, ran **8+ A/B tests on landing and registration** that lifted **activation 25%**, and shipped an in-product referral loop that drove **60% of net-new signups** with zero paid budget. Sarvam's PM Growth seat is the same work at a much bigger surface, on the most important AI mission in India.

Direct evidence I am the right operator:

- **Activation and onboarding charter (SwipeHire, founder):** Designed cold-visit to first-match flow; instrumented GA4 + GTM at every step; ran 8 A/B tests on landing + registration; lifted activation 25% and cut email-verification abandonment from 47% to 24%. Weekly D1/D7/D30 cohorts informed every iteration.
- **Channel strategy and closed-loop attribution (Plug Power):** Rebuilt the full attribution layer from ad click to SQL on Salesforce + Adobe + GA4 + GTM. Wrote UTM spec from scratch, killed low-quality keyword clusters via SQL + cohort scoring, cut CPA 25% and wasted spend 15% while lifting conversion 20%.
- **Cross-channel growth ops on an AI platform (Pixis):** Managed an 8-client B2B SaaS + D2C portfolio at \$15K-\$90K per-client monthly budgets across Google, Meta, Criteo, programmatic. Cut client churn 50% via renewal-aligned playbooks and weekly CFO QBRs translating channel metrics into pipeline narrative.
- **Cohort segmentation at scale (Sensata):** Built KPI framework in SQL + GA4 on usage telemetry across 50K+ connected devices; high-intent cohorts lifted feature adoption 18% and informed two product launches.
- **AI-native execution:** 4 Anthropic Claude certifications (Claude 101, Code 101, Cowork, API). SwipeHire on Python + OpenAI API. NSE bot on Claude API for catalyst reasoning. Cursor + Claude is my daily workflow.

BITS Pilani undergrad, Pixis was Indian-founded, and I have been waiting for the right seat to come home and build. Sovereign AI for Indian languages, agentic platforms, and edge deployments at the scale Sarvam is targeting is the most exciting growth surface I can imagine working on. Open to Bengaluru on-site.

Looking forward to talking.
