Vertical SaaS PMM Job, Already in Motion

Skimmer JD

- Primary research: customer interviews, win/loss, surveys, competitive monitoring
- Synthesize insights into actionable strategy
- Shape product roadmap with PM
- GTM + pricing + commercialization (NPI)
- Positioning + messaging that resonates with practitioners
- *"You actively use AI tools (Claude or ChatGPT) in your day-to-day workflows"*

What I Have Already Run

30+

Anthropic Claude certifications

- Multi-region GTM across NA + EU + 3 regions
- Pricing + commercialization strategy executed at Sensata
- Claude + ChatGPT + Gemini are my daily loop, not aspirational tools

Sensata Customer Research to Revenue, In Motion Today

The Skimmer JD describes "primary research, customer interviews, win/loss analysis, competitive monitoring, synthesize into actionable insights, positioning, sales enablement, GTM." Below: the same flow already running at Sensata, with the outcome the org renews on.

Same loop Skimmer needs to run on the pool service buyer

Replace OEM/distributor with pool pro on the truck. Replace fuel cells with route optimization. Loop is identical.

What I Shipped to 50+ Sensata Reps

Sales enablement that wins is the kind reps actually open on Monday. Below: the four artifact types I produced from the customer-research output, with the outcomes the org renews on.

Decks

Persona-tuned

Per-segment narrative built from 30+ interview transcripts. Buyer language, not feature dumps. Versioned per region for hreflang-aware messaging.

Case Studies

Quantified

Customer outcome stories with the metric the buyer actually cares about. Built directly from primary-research conversations. Used in deal review and conference panels.

Battlecards

Competitor-by-competitor

10+ players covered. "When you hear X, say Y." Updated as competitors reframed features. Surfaced before deal review, not after.

FAQs

Schema-structured

Pulled from win/loss objection patterns. Doubles as AEO/GEO content for ChatGPT, Claude, and Perplexity citation on practitioner queries.

+30%

Win Rate Lift Across 50+ Reps

+22%

CSAT (Customer Satisfaction Score)

+8%

Market Share, +12% YoY Revenue

The artifact discipline that travels. The four-artifact library is the same one Skimmer needs to ship to its sales team for the pool service vertical. Replace OEM with pool pro. Replace fuel cells with route optimization. The structure is the artifact; the language gets rewritten from the practitioner's mouth in week two.

The JD's Verbatim Language Is the Loop I Already Live In

The JD: "You actively use AI tools (such as Claude or ChatGPT) in your day-to-day workflows." Below: the four pieces of my AI stack already serving a PMM workflow at production scale.

15 Minutes With the Hiring Team

What I would want to understand: which segment of pool pro (solo operator vs route-density mid-market vs multi-location enterprise) is currently driving the most net-new revenue, how the win/loss synthesis flows back into product roadmap conversations today, and what the year-one shape of the PMM function looks like alongside Director, Product Marketing.

What I would bring to the conversation: a one-page proposal for the first three customer-research initiatives I would run in week two, a draft battlecard outline for the closest competitor, and a quick read on which Claude pipeline plays would compound fastest given the practitioner-language gap most vertical SaaS messaging hits.

Austin or Remote works. Open to relocating from Boston for the right team.

15-Minute Hiring Manager Call

or written async if easier
