Hiring Team, Soraban,

Soraban is building AI tax workflow for accounting firms - a buyer that is technically literate, time-poor, and skeptical of marketing fluff. Demand gen has to be sharp, multi-channel, and grounded in measurement. That is the work I have already done at Plug Power and Pixis.

Direct evidence I am the right operator:

- **Plug Power demand gen rebuild:** Full MarTech stack on HubSpot + Salesforce + Adobe + GA4 + GTM. -25% CPA, +20% conversion across Google + Meta + LinkedIn + programmatic. Coordinated 3 industry conferences and 6+ webinars with on-site lead capture into Salesforce and follow-up sequences. Lifted MQL to SQL conversion across product lines.
- **Pixis AI marketing platform CSM:** 8 enterprise clients, \$15K-\$90K per-client monthly budgets. Trained client teams on RL bid optimization, generative creative testing, pLTV pacing. 3x ROAS validated via holdout incrementality. So I understand selling AI software to skeptical professional buyers.
- **SwipeHire (founded solo):** Built on Python + OpenAI + React (app.swipehire.io). 50+ users, +25% activation, zero paid budget. Fluent on the AI-product builder side too.

Plug Power, Pixis, and SwipeHire are the three exact muscle groups Soraban needs: MarTech rebuild for scale, AI platform deployment to professional buyers, and founder-led growth iteration. I am Boston-based and open to relocating to Chandler, AZ for the right role.

Looking forward to talking.
