Hiring Team, Tavus,

The Tavus JD describes a role that sits outside a traditional marketing structure, reports to the founder, and owns narrative end-to-end at weekly launch cadence. That is the work I have been doing for the last 18 months at Sensata, just on a different surface area.

At Sensata I lead product marketing and pricing for the Industrial BU. The job is to translate dense sensor architecture (capacitive, pressure, MEMS) into VP and C-level narratives for OEMs and distributors who are technically deep, skeptical of new tooling, and conservative about what they trust. I have run 30+ customer interviews, shipped a sales enablement library that lifted win rates 30%, executed a GTM for new sensing products that drove \$2M+ in first-year revenue, and built the kind of product-launch content (hero pages, demos, case studies, announcements) Tavus needs at weekly cadence.

A few proof points that map to your distribution and growth profile:

- **Plug Power:** rebuilt the MarTech stack and shipped SEO + AEO/GEO + paid search + paid social + email - cutting CPA 25% and lifting conversion 20%. Coordinated 3 industry conferences and 6+ webinars.
- **Pixis:** trained 8 enterprise marketing teams on an AI marketing platform with per-client monthly budgets of \$15K-\$90K. I know what it feels like to be the human translating AI-product reality into stakeholder confidence.
- **SwipeHire:** founded an AI tool I shipped solo on Python + OpenAI API + React (app.swipehire.io). 50+ early users, +25% activation, zero paid budget. So I am fluent in the ElevenLabs / Lovable / Tavus category of products and how their buyers actually think.

I am Boston-based and ready to relocate to San Francisco.

Looking forward to talking.
