Hiring Team, Uplane,

The Uplane pitch maps almost 1:1 to the job I just held. At Pixis, I was the Customer Success Manager for an AI marketing platform that did cross-channel bid optimization, generative creative variants, and audience modeling for enterprise clients. I owned 8 accounts with per-client monthly media budgets of \$15K-\$90K and was the human-in-the-loop on the AI engine: training client marketing teams, translating model outputs into stakeholder-ready recommendations, and stepping in when the platform recommended something the client could not defend internally. The work Uplane is describing - own customer relations, advise on digital marketing, execute campaigns using our technology - is the exact work I did, with a different product name on the wrapper.

A few proof points that map directly:

- **3x ROAS in one month** for a fashion D2C partner, validated by holdout incrementality testing and a full-funnel rebuild on Shopping, smart bidding, creative, and lookalikes.
- **Cut client churn 50%** by writing per-client renewal playbooks and replacing two underperforming channels mid-quarter when KPIs slipped.
- **Trained 8 enterprise marketing teams** on reinforcement-learning cross-channel bid optimization, generative creative-variant testing, and pLTV-weighted budget pacing layered on Meta Advantage+ and Google Smart Bidding (tROAS, Max Conversion Value).

I also know where AI marketing platforms quietly break. I have seen the failure modes (bid model overfit on small-budget accounts, creative gen that loses brand voice, attribution drift when the engine and the platform pixel disagree) and I know how to communicate them to a CFO without shaking confidence in the product.

On the AI-product side: I founded **SwipeHire**, an AI job-matching tool I shipped solo on Python + OpenAI API + React (app.swipehire.io). So I get both sides of the AI handoff - what it feels like to build the model and what it feels like to sell its output.

I am Boston-based and ready to relocate full on-site to San Francisco.

Looking forward to talking.
