

FOUNDING MARKETER PITCH DECK

I read tech blogs as a builder. Then I market them.

Founded SwipeHire on Python + OpenAI + React. Marketed Sensata sensor architecture to skeptical engineering leaders. The Weave buyer is exactly the audience I have already converted.

Why an AI-builder belongs in Weave's founding marketer seat

Weave sells to engineering leaders who think current measurement is broken. They are skeptical of marketing-built dashboards, only convert on substance, and read tech blogs more than landing pages. I have built and marketed to that exact buyer.

AI BUILDER CRED

SwipeHire

Shipped solo on Python + OpenAI + React. I read your tech blog the way your customers do.

TECHNICAL-BUYER TRANSLATOR

30+ Interviews

Sensata: translated capacitive/pressure/MEMS sensor specs into VP-ready narrative. Sales enablement library lifted win rates 30%.

AEO/GEO NATIVE

Live programs

Plug Power: shipped Answer Engine Optimization so the brand surfaced in ChatGPT/Claude buyer queries.

WEAVE FOUNDING MARKETER JD NEED	DIRECT EVIDENCE
Founding marketer at AI-native company	SwipeHire: founded brand from zero on Python + OpenAI + React. 50+ users, zero paid budget.
Talk to engineering leaders natively	Built SwipeHire end-to-end. BE Mechanical Engineering from BITS Pilani. I can read your codebase + measurement model.
Multi-format content (long-form + short-form + technical)	Sensata + Plug Power: hero pages, demos, case studies, product announcements, long-form, webinars, conferences.
Distribution (SEO, AEO, social, PR)	Plug Power: shipped SEO + AEO/GEO. Pixis: trained 8 enterprise teams on a new AI category. SwipeHire: founder-led LinkedIn + X.
Brand from zero + category creation	SwipeHire: voice + tone + positioning + 5+ ICP landing pages built solo.

The SwipeHire + Sensata playbook for Weave

Weave is selling something engineering teams will only adopt if it respects their domain depth. The Sensata buyer was the same. SwipeHire taught me to ship marketing as fast as the product evolves.

What I have shipped that matters here

- **SwipeHire founder marketing:** brand from zero, 5+ ICP landing pages, 12+ LinkedIn + X posts, referral loop driving 60% of signups, weekly product updates with demos and changelog
- **Sensata sales enablement:** Library used by 50+ reps. Translated capacitive/pressure/MEMS sensor architecture into VP-ready talk tracks. Lifted win rates 30%.
- **Plug Power AEO/GEO:** Shipped programs so the brand surfaced in ChatGPT and Claude buyer queries when engineering buyers asked "how do I measure X". -25% CPA across paid channels.
- **Pixis category-creation:** Trained 8 enterprise teams on a new AI marketing platform category. Knew how to communicate AI to a skeptical CFO.

"The Weave buyer wants to see how the measurement model works, not how clean the landing page is. I would write the technical blog, not just the product page."

How I would ramp at Weave

- **Week 1-2:** Sit with founders + 3 customers. Read codebase commits and product roadmap. Map 3 buyer personas (Eng Mgr, VP Eng, CTO). Draft brand voice + technical-tone style guide.
- **Week 3-4:** Ship 1 founder-led technical post on LinkedIn + Hacker News. Launch comparison content (Weave vs. status quo measurement). Audit website for engineering-buyer trust signals.
- **Month 2:** Weekly product launch rhythm with changelog + demo video. 2 customer case studies (Rho, 11x style). Start AEO program so Weave surfaces in ChatGPT engineering queries.
- **Month 3:** Flagship long-form (research-grounded report on engineering measurement). Hand off playbooks. Standing weekly rhythm with Product + Eng.

My 30 / 60 / 90 at Weave

SF on-site, founding marketer, 1+ Yrs (well-fit at 4+). 13-person company, \$4.2M seed, 150+ customers including Rho, 11x, Browserbase.

30

Days 1-30: Sit with founders + 3 customers. Read codebase + roadmap. Map 3 personas. Draft voice + style guide. Ship 1 technical founder post. Audit website.

60

Days 31-60: Weekly product update rhythm with changelog + demo. 2 customer case studies. AEO program launch. Stand up comparison content + measurement-broken thought leadership.

90

Days 61-90: Flagship long-form. 5+ case studies. Standing rhythm with Product + Eng. Hand off playbooks. Begin paid pilot if signal warrants.

Why a builder marketer wins here

Founded **SwipeHire** on **Python + OpenAI + React** (app.swipehire.io). I have written the LLM scoring logic, debugged production, and shipped to real users. I can write the Weave blog post that engineering teams will share.

Plus 4 Anthropic Claude certifications + BE Mechanical Engineering from BITS Pilani.
