

# I built an **AI brand** from zero. **Same thing.** For a0.dev.

SwipeHire: founded solo on Python + OpenAI + React. Voice, content, distribution, 50+ users, zero paid budget. Now offering the same playbook to a0.dev.

# Why a brand-from-zero AI-builder is the right hire

*a0.dev's audience is mobile developers and AI-curious founders. The Brand and Content Lead has to be one of them, not market to them.*

## BRAND SOLO FOUNDER

### SwipeHire

Built voice, tone, positioning, content, and distribution end-to-end on Python + OpenAI + React.

## MULTI-FORMAT CONTENT

### All Formats

Landing pages, demos, case studies, social, webinars, conferences, product announcements - shipped each at Sensata + Plug Power.

## AI BUILDER CRED

### 4 Claude Certs

SwipeHire on OpenAI API. Reads a0.dev's stack natively.

## A0.DEV BRAND AND CONTENT JD NEED

## DIRECT EVIDENCE

Build brand from zero (voice, tone, positioning)

**SwipeHire: owned voice + tone + 5+ ICP landing pages + founder content from day one.**

Ship multi-format content (long-form, short-form, video, demos)

**Sensata: hero pages, demos, case studies, product announcements. Plug Power: long-form + webinars + conferences.**

Founder-led content + community

**SwipeHire: 12+ LinkedIn + X posts, referral loop drove 60% of net-new signups.**

AI-builder fluency (talk to the audience natively)

**Founded SwipeHire on Python + OpenAI + React. 4 Anthropic Claude certifications.**

Distribution (SEO + social + PR + community)

**Plug Power: SEO + AEO/GEO for AI buyer queries. Pixis: shipped category-defining content for 8 enterprise clients.**

# The SwipeHire-to-a0.dev playbook

*SwipeHire is the closest analog: AI-product, mobile-friendly, indie-builder audience. I have done it for myself. I would do it for a0.dev.*

## What I shipped at SwipeHire

- **Voice and tone system:** direct, builder-friendly, no AI-hype cliches. Mirrors how I actually talk on LinkedIn.
- **5+ landing page variants by ICP:** early-career, mid-level, transitioning - each had a different hero, CTA, and proof point.
- **Founder-led content (12+ posts):** LinkedIn + X. Every post tied to a specific user story or product release. Engagement-per-post was 3x my long-form output.
- **Referral loop:** drove 60% of net-new signups. Built it in the same week as the MVP.
- **Weekly product launches:** launch post + demo + changelog every Friday.

*"a0.dev needs someone who has actually shipped an AI product and marketed it. That is what I would bring to day one."*

## What I would ship at a0.dev

- **Brand voice and style guide** for the AI-builder audience (developer-tone, not corporate-AI)
- **Customer story factory:** 1 case study per week, anchored to a single hero metric (time-to-app, MVP-to-launch days, etc.)
- **Founder content rhythm:** 5 posts per week across LinkedIn + X + YC channels + Hacker News + Reddit r/programming and r/startups
- **Comparison + AEO content:** so a0.dev surfaces when builders ask ChatGPT or Claude "how do I build a mobile app with AI"
- **Demo video factory:** shipped weekly with each product update. Cursor / Lovable / v0 model - high velocity, low production overhead

Brand from zero

Multi-format

Founder voice

AI-native

# My 30 / 60 / 90 at a0.dev

*Contract-to-Hire, on-site SF, founder-direct. Calibrated to that cadence.*

30

**Days 1-30:** Sit with founder + 5 customers. Audit current brand surfaces (website, docs, social, demo videos). Draft voice + style guide. Ship one founder-led launch post and one customer case study.

60

**Days 31-60:** Stand up weekly content rhythm: 5 posts per week + 1 case study + 1 demo video. Launch comparison page targeting "AI mobile app builders" search intent. Start a developer community newsletter.

90

**Days 61-90:** Brand voice is repeatable - other team members can write in it. Have 5+ case studies + 1 flagship long-form piece + a content engine producing organic traffic. Hand off documented playbooks.

## The AI-builder angle

I founded **SwipeHire** on **Python + OpenAI API + React** ([app.swipehire.io](http://app.swipehire.io)). I have shipped the exact kind of product a0.dev's customers are trying to build.

Plus 4 Anthropic Claude certifications. Reads your stack natively.
