

FOUNDING GROWTH LEAD PITCH DECK

Mobile UA. **AI builder.** Founder-led growth. **All three.**

Owned iOS paid UA via Appsflyer + Adjust + SKAN for consumer-mobile clients at Pixis. Founded SwipeHire on Python + OpenAI + React. Boston-based, ready to relo SF.

Prepared for Hiring Team, a0.dev · 2026-05-13

\$1.4M

PIXIS PORTFOLIO MANAGED

8 enterprise clients, \$15K-\$90K/mo each, incl. iOS mobile UA

16x

D2C ROAS AT GENY

Google Merchant + Meta catalog rebuild

50+

SWIPEHIRE USERS

Python + OpenAI + React, zero paid budget

Why a0.dev gets all three pieces in one hire

a0.dev's audience is mobile developers and AI-product builders. The Founding Growth Lead needs to run paid acquisition (mobile-aware), ship founder-led content (AI-fluent), and operate inside the builder community.

MOBILE UA DEPTH

iOS native

Pixis: managed iOS paid UA via Appsflyer + Adjust + SKAN post-IDFA attribution, cohort LTV modeling, Apple Search Ads, Google UAC, Meta App Install.

AI BUILDER CRED

4 Claude Certs

SwipeHire shipped solo on Python + OpenAI API + React (app.swipehire.io). Claude 101, Code, Cowork, Building with Claude API.

FOUNDER DISTRIBUTION

60% Referral

SwipeHire net-new signups came from a founder-led referral loop and LinkedIn + X content. Zero paid budget.

A0.DEV FOUNDING GROWTH JD NEED	DIRECT EVIDENCE
Mobile paid acquisition (consumer apps)	Pixis: iOS UA on Appsflyer + Adjust + SKAN for consumer-mobile clients across \$15K-\$90K monthly budgets.
AI-native fluency (talk to AI builders natively)	Founded SwipeHire on Python + OpenAI + React. 4 Anthropic Claude certifications.
Founder-led content + distribution	SwipeHire: founder-led LinkedIn + X content (12+ posts), referral loop drove 60% of net-new signups.
Multi-channel range (paid + content + lifecycle)	Plug Power MarTech rebuild: Google + Meta + LinkedIn + programmatic + email. -25% CPA, +20% conversion.
Data-driven, fast experimentation	8+ A/B tests at SwipeHire (+25% activation). Pixis: holdout incrementality testing validated 3x ROAS in 1 month.

The mobile-AI growth playbook I bring

a0.dev is generating mobile apps with AI. The growth lead has to understand both: what gets a mobile app to first install + retention curve, AND what gets an AI-product builder to try the platform in the first place.

What I have shipped for mobile + AI products

- **Pixis iOS UA stack:** Appsflyer + Adjust attribution, SKAN post-IDFA workarounds, cohort LTV modeling, Apple Search Ads + Google UAC + Meta App Install creative + bid testing
- **SwipeHire growth solo:** 5+ landing page variants by ICP, founder-led LinkedIn + X content (12+ posts), referral loop, weekly product launches with demos and changelog
- **GenY D2C consumer:** 16x ROAS via Google Merchant + Meta catalog rebuild, feed cleanup, schema fixes, structured Shopping, weekly creative refresh
- **Pixis Codex platform:** trained 8 enterprise teams on reinforcement-learning bid optimization, generative creative-variant testing, pLTV-weighted budget pacing

"I have done both sides: bought mobile app installs at scale on a platform team, and shipped an AI tool solo where every signup came from founder content."

How I would ramp a0.dev's growth function

- **Week 1-2:** Audit current customer install funnel. Map cohort retention curves by acquisition source. Identify top 3 churn moments.
- **Week 3-4:** Stand up paid pilot - Apple Search Ads + Meta + creator partnerships targeting "build an app with AI" intent. Document attribution stack.
- **Month 2:** Ship founder-led content rhythm (5 posts per week on LinkedIn, X, YC ecosystem). Convert it into an early-user community.
- **Month 3:** Run holdout incrementality test on the first paid channel that works. Hand off playbook docs so the next 2 growth hires can ramp fast.

iOS UA native

AI builder

Founder content

Data-driven

My 30 / 60 / 90 at a0.dev

Contract-to-Hire, on-site SF, founder-direct. Calibrated to that cadence.

30

Days 1-30: Sit with 5 customers. Audit install funnel + cohort retention. Map 3 buyer personas (solo indie devs, AI-curious founders, growth-stage product teams). Ship 1 paid pilot on Apple Search Ads + 1 founder-led launch post.

60

Days 31-60: Stand up weekly content rhythm (LinkedIn + X + YC + Hacker News). Launch creator partnership pilot. Build attribution dashboard tying paid to install to retention.

90

Days 61-90: Run holdout incrementality on the first paid channel. Have measurable CAC payback by ICP. Hand off documented playbooks for the next 2 hires.

The AI-builder angle

I founded **SwipeHire** on **Python + OpenAI API + React** (app.swipehire.io). I read a0.dev's docs natively and have shipped to AI builders. Plus 4 Anthropic Claude certifications.
