

PITCH DECK | VERCEL SENIOR DEAL DESK ANALYST

Vercel's Deal Desk needs a gatekeeper who has already priced margin recovery deal by deal. I have done that at \$700K+ scale.

Deal approvals, CPQ configuration and revenue integrity from someone who has run the pricing side of the gate, not just the paperwork side.

\$700K+ margin recovered in 2 quarters, deal by deal

53% to 61% distributor margin lift via discount-logic repricing

\$627M pipeline tracked, 1,200 opportunities, \$433M in gaps surfaced

PriceKeel - founder, runs CRM, CPQ and deal-approval workflow end to end

Claude AI agents - automates recurring pricing analysis at Applied Materials

The posting is direct: own quote-to-contract execution end to end while keeping the data clean enough to trust.

What losing that discipline runs into

A Deal Desk without a real gatekeeper does not fail loudly. It fails as a discount exception nobody flagged, an opportunity record that drifts from what Sales actually agreed to, and a revenue-recognition audit that starts a quarter late.

Finance, Legal, GTM, Partnerships, Product and Pricing all touch the same deal, so a gap in deal-review judgment becomes everyone's forecasting problem, not just one team's.

The fix is not another approval step. It is someone who has already made the pricing call on the other side of the gate, not just routed the paperwork through it.

What I have already run, at smaller scale

At **PriceKeel**, I built the CRM, CPQ configuration and deal-approval workflow myself, then the audit trail that gives Finance an explainable record behind every discount exception.

At **Sensata**, I led the Bleeders and Leakers program: deal-by-deal negotiation against competitive gaps and customer willingness to pay, recovering \$700K+ in margin in 2 quarters.

Both mean I have sat on the pricing side of a deal review, not only the process side of one.

A Senior Deal Desk Analyst who owns deal approvals, deal structuring and quote configuration while acting as the gatekeeper of revenue integrity is describing this exact loop: price the exception, document the decision, and keep Finance's data clean.

What the Senior Deal Desk Analyst opening asks for, and where the proof sits.

What the role covers

- "Own the day-to-day deal review and closing process end to end, including deal approvals, deal structuring, and quote configuration within Vercel CPQ."*
- "Act as the gatekeeper of data hygiene and opportunity data, partnering with GTM and Finance on audits for revenue recognition, financial reporting, and forecasting."*
- "Identify opportunities to streamline, enhance, and automate processes, leveraging AI and automation to scale."*

My Proof

- Deal approvals and structuring:** ran deal-by-deal negotiation against competitive gaps and willingness to pay in Sensata's Bleeders and Leakers program, recovering \$700K+ in margin in 2 quarters.
- Quote configuration in CPQ:** set up and run PriceKeel's own CRM, CPQ configuration and deal-approval workflow end to end, the exact system this seat administers for Vercel's sales org.
- Revenue integrity and data hygiene:** built the audit trail that gives Finance an explainable record behind every discount decision, plus a Power BI system Finance and leadership audited against a \$627M target.
- AI and automation to scale:** automate repetitive pricing and forecasting analysis with Claude AI agents as Strategic Marketing III at Applied Materials.

Bleeders and Leakers: the deal-desk discipline behind a \$700K margin recovery.

Built as a BU-wide Power BI system covering 1,200 pricing opportunities against a \$627M target across 3 regions, 4 product families and 20 product lines, with every margin gap traced to a specific deal record before leadership prioritized which ones to fix.

\$433M

Margin Gaps Surfaced

Each gap traced to a salesperson and product line, the same deal-level detail a Deal Desk audit needs to be actionable.

53% to 61%

Distributor Margin Lift

Repriced the channel discount logic and documented it so Finance could audit the new terms on sight.

\$700K+

Margin Recovered, 2 Quarters

Recovered deal by deal, negotiating against competitive gaps and each customer's own willingness to pay.

At PriceKeel that same instinct became the system itself: I run the CRM, CPQ and deal-approval workflow, then the audit trail behind it, so the deal and the ledger tell the same story.

What the first month on Vercel's Global Deal Desk team looks like.

WEEK 1 Learn the deal flow and CPQ Sit with the Senior Manager, Global Deal Desk and Finance, Legal, GTM, Partnerships and Product to walk the current quote-to-contract process, Vercel's CPQ configuration and the deal-approval matrix end to end. Why first: the same instinct that had me learn PriceKeel's own deal flow before building anything on top of it.	WEEK 2-3 Own a deal-review cycle Take ownership of the day-to-day deal approval and closing process for a live cohort of deals, becoming Sales' trusted advisor on structuring and quote configuration while flagging data-hygiene gaps as they surface. Why now: the same deal-by-deal negotiation discipline behind the Bleeders and Leakers recovery.	WEEK 4 Automate one manual step Identify one recurring, manual step in the deal-review or reporting cycle and script or template it, the same operational-excellence habit that automates pricing analysis with Claude AI agents today. Why this fast: streamlining and enhancing the process is only credible once someone has run it by hand first.
--	---	--

CLOSE

You are hiring someone to be the gatekeeper of deal structuring and revenue integrity. I have already run that gate, at \$700K+ scale.

The core proof is Sensata: **\$700K+ in margin recovered in 2 quarters** through deal-by-deal negotiation, distributor margins lifted **from 53% to 61%**, and a Power BI system that tracked 1,200 opportunities against a **\$627M target**, all run cross-functionally with Sales, Finance and senior executives.

What is harder to find is someone who has also built the CPQ and deal-approval system from the other side of the desk. **I built that at PriceKeel**, so the quote-to-contract discipline this role owns is not something I would need to learn on the job.
