

PITCH DECK | FACTORY DEAL DESK LEAD

One seat here owns quote-to-booking end to end, Salesforce Revenue Cloud as the system of record, deal review for booking readiness, and the Sales-Finance-Legal governance trail that keeps it all honest. I have already run every piece of that loop.

Deal-by-deal judgment, CPQ system ownership and booking-data discipline from someone who has built the audit trail, not just approved the quote.

\$700K+ margin recovered in 2 quarters via deal-by-deal quote review at Sensata

53% to 61% distributor margin lift from repriced discount logic

CRM + CPQ configuration and audit trail owned end to end, founder of PriceKeel

1,200 opportunities tracked against a \$627M target across 3 regions, 4 product families, 20 lines

Claude AI agents automating recurring pricing analysis at Applied Materials

Quote-to-booking at a fast-scaling AI company is three jobs held by one seat: deal review, CPQ ownership, and cross-functional governance.

What losing that discipline runs into

A deal desk without deal-by-deal review does not fail loudly. It fails as a quote booked on last quarter's discount logic, a CPQ workaround nobody documented, and a booking record Finance cannot trace back to its own approval.

Sales, Finance and Legal all touch the same quote on its way to booking, so a gap in CPQ ownership or booking data integrity becomes everyone's guessing game at close, not just one team's problem.

The fix is not another approval step. It is someone who treats quote review, system ownership and governance as one connected loop instead of three separate jobs.

What I have already run

At **PriceKeel**, I set up and run the CRM, CPQ configuration and the audit trail myself, the same system-ownership and governance loop this seat holds for Salesforce Revenue Cloud.

At **Sensata**, I reviewed deals for booking readiness and discount exceptions one by one inside the Bleeders and Leakers program, building the commercial terms behind multimillion-dollar customer quotes.

Both mean I have sat on the quote-approval side and the system-configuration side of the same gate, not just one or the other.

A Deal Desk Lead who owns quote-to-booking, administers Salesforce Revenue Cloud CPQ, ensures booking data integrity, and guides Sales toward higher-value deal structures is describing this exact loop: review the deal, configure the system, keep the record honest.

What the Deal Desk Lead opening asks for, and where the proof already sits.

What the role covers

- Design and manage quote-to-booking processes, serving as primary owner for Salesforce Revenue Cloud CPQ administration.*
- Ensure booking data integrity and review deals for booking readiness.*
- Collaborate with Sales, Finance, and Legal on pricing frameworks, and guide Sales toward deal structures that increase velocity while maximizing value.*
- Find ways to leverage Factory droids to streamline quote-to-booking processes.*

My Proof

- Quote-to-booking and CPQ ownership:** set up and run PriceKeel's own CRM and CPQ configuration, forecast and pipeline reviews, and deal approvals end to end, the same system-of-record ownership this seat holds for Salesforce Revenue Cloud.
- Booking data integrity and deal review:** reviewed deals for booking readiness one by one inside the Bleeders and Leakers program at Sensata, and built the audit trail that gives Finance an explainable record behind every pricing decision at PriceKeel.
- Cross-functional deal structuring:** partnered with senior executives on AP26 revenue models and multimillion-dollar customer quotes, and raised distributor margins from 53% to 61% by repricing deal structures with Sales and Finance.
- AI fluency:** automate repetitive pricing and forecasting analysis with Claude AI agents at Applied Materials, the same instinct I would bring to finding where Factory droids remove manual quote-to-booking work.

Bleeders and Leakers: make every quote defensible before it ever reaches booking.

Built as a BU-wide Power BI system covering 1,200 pricing opportunities against a \$627M target across 3 regions, 4 product families and 20 product lines, with every gap traced to a specific deal record before leadership set the next quarter's targets.

\$700K+

Margin Recovered, 2 Quarters

Deal-by-deal review of discount exceptions against competitive gaps and each customer's own deal history, the same investigation a booking-readiness review runs on every transaction.

53% to 61%

Distributor Margin Lift

Repriced the channel's deal structure and documented it for governance review, so the new discount limits held past the first quarter.

\$433M

Margin Gaps Surfaced

Every gap traced to a specific deal record by salesperson and product line, the same record-level detail booking data integrity depends on.

At PriceKeel that same instinct became the operating model: I run the CRM, CPQ configuration and the audit trail myself, so the quote and the booking record are never two different stories.

What the first month owning Deal Desk at Factory looks like.

WEEK 1 Learn Salesforce Revenue Cloud and the current flow Sit with Sales, Finance and Legal to walk the current quote-to-booking process, CPQ configuration and discount-approval limits, and shadow one deal review for booking readiness end to end. ----- Why first: the same instinct that had me learn PriceKeel's own CPQ configuration before building anything on top of it.	WEEK 2-3 Own a full quote-to-booking cycle Take ownership of one deal segment's quote-to-booking cycle end to end: review the deal for booking readiness, guide Sales toward a deal structure that holds velocity and value, and confirm the booking record ties back to the approval. ----- Why now: the same deal-by-deal discipline that recovered \$700K+ in margin inside the Bleeders and Leakers program.	WEEK 4 Pilot a droid inside quote-to-booking Identify one repeatable step in the quote-to-booking workflow, pilot a Factory droid against it, and tighten booking data integrity on one record type worth a governance review before the next quote cycle. ----- Why this fast: a governance trail only earns its keep if it gets re-checked every cycle instead of trusting last quarter's setup.
---	--	--

CLOSE

You are hiring someone to keep quote-to-booking, CPQ and governance honest across every deal. I have already built that discipline, from both sides of the quote.

The core proof is Sensata: a Power BI system tracking **1,200 pricing opportunities against a \$627M target**, distributor margins lifted **from 53% to 61%**, and \$700K+ in margin recovered in 2 quarters through deal-by-deal review of discount exceptions and booking readiness.

What is harder to find is someone who has also spent the last several months owning the CRM, CPQ configuration and audit trail for his own company's deal flow. **I built that at PriceKeel**, so the system ownership and governance discipline this role runs is not something I would need to learn on the job, only which droid to point at it first.
