Hiring Team, Google

The Sales Operations Senior Associate posting for Global Product Solutions asks for a management-consulting or sales-operations background that can run complex, cross-functional workstreams end to end. I led a 5-consultant team through a TAM/SAM/SOM engagement for Safran, taking 170 facilities down to a SAM of 28 across four verticals and presenting the roadmap straight to their leadership. That is the same muscle this role needs: turn a messy, ambiguous business question into a structure a GPS leader can act on, then stay close enough to the data to defend it in the room.

I run that discipline today as founder of PriceKeel, where I own CRM, CPQ, forecast and pipeline reviews, and deal approvals, with an audit trail Finance can check against the underlying deal data. At Sensata I built the FY2026 Bleeders and Leakers Power BI dashboard, scoring 1,200 pricing opportunities against a $627M target across 3 regions so leadership could prioritize $433M in margin gaps instead of guessing where to look, and I carried that same rigor into AP26 revenue models and multimillion-dollar customer quotes directly with senior executives. None of it holds past one quarter without an operating cadence behind it, which is why I also run OKRs and the weekly and quarterly business reviews that keep a plan alive once it is live.

The advertising and digital-media side of this req is not new territory for me either. At Pixis I carried P&L targets for an 8-client, $15K-$90K/month advertising portfolio, running retail media on Amazon Ads and Criteo with consultative account management day to day; at Plug Power I led paid search and social across Google Ads, Microsoft Ads, Meta and LinkedIn. I write my own SQL and Python against the underlying data rather than handing someone else's chart to a room, and I automate the recurring parts of that analysis with AI agents built on Claude at Applied Materials today. I would bring that same bias toward a defensible model and a working cadence to GPS StratOps and GTM Operations.
