Hiring Team, Pallet

Your posting asks for someone who can carry an account from business case to realized ROI. At Sensata I ran exactly that motion on a $627M target: I built the model behind the Bleeders & Leakers program, a pipeline of 1,200 pricing opportunities scored by competitive gap and customer willingness to pay, and closed $700K+ of it into recovered margin in two quarters.

The account-level work matched the scale. I raised distributor and channel-partner margins from 53% to 61% inside two quarters by repricing parts sold through distribution, the kind of account that was quietly losing money until someone built the case to fix it. I partnered directly with senior executives on multimillion-dollar customer quotes and site transition strategy, so the executive-communication side of a value case is not new ground for me either.

I also know what it takes to build the infrastructure underneath that case, not just run the model once. As founder of PriceKeel I run CRM, CPQ, deal approvals and forecast reviews myself, and the product's whole premise is an audit trail Finance can actually review, the same discipline Pallet needs as it builds out contracting and deal desk process behind each account.
