Hiring Team, Sovos

Your posting asks for someone who can own pricing and monetization strategy across a global portfolio and still write the sales narrative that makes it land with reps and executives. That split is exactly what I ran at Sensata: I led global pricing strategy for a multi-$100M Industrial BU, recovered $700K+ in margin in two quarters through the Bleeders and Leakers program, and then built the battlecards and competitive benchmarking that got the new pricing adopted in the field rather than shelved after the dashboard review.

The commercial-impact analysis you want partnered with Finance and BizOps is also the part I enjoy most. At Sensata I raised distributor and channel-partner margins from 53% to 61% and shaped AP26 revenue models and multimillion-dollar customer quotes directly with senior executives, where a pricing story only worked if Finance could trust the math behind it. I am building that same discipline from scratch right now at PriceKeel, a decision-integrity layer for B2B SaaS deal pricing: the audit trail I built gives Finance line-by-line evidence for every discount exception, instead of a gut call nobody can defend later.

Packaging and monetization initiatives move fastest when someone is already using AI tools to read the adoption and discounting data behind them, not waiting for a quarterly report to surface it. I automate that kind of analysis today with Claude AI agents as Strategic Marketing III at Applied Materials, turning usage and expansion signals into pricing and forecasting calls for a fast-moving market. For a tax-compliance platform with Sovos's breadth of products and customers, I would bring that same habit of pairing the pricing math with the story that gets Sales to actually use it.

I would welcome fifteen minutes to talk through how that maps onto your pricing and packaging roadmap. Proof trail at adhi-pricing-ai.vercel.app/ref/sovos.
