Hiring Team, Block

Your posting for Product GTM Operations Senior Manager asks for someone who builds scalable operating mechanisms through templates and playbooks, then runs them across Product, Sales and Marketing. That is the exact shape of the Bleeders and Leakers program I built at Sensata: a Power BI dashboard tracking 1,200 pricing opportunities against a \$627M target across 3 regions, 4 product families and 20 product lines, with win rate, dollar-per-win and stage distribution built in. It surfaced \$433M in margin gaps for leadership to prioritize by salesperson and product line, and fed a \$700K+ margin recovery over two quarters.

The cross-functional coordination side of the role is work I do today. At Applied Materials I carry P&L and revenue targets while partnering across Sales, Engineering and Accounts to turn field and technical input into one shared market view, and I automate the repetitive reporting underneath that work with AI agents built on Claude. At PriceKeel, the company I founded, I run the CRM, CPQ, forecast reviews and deal approvals myself, with an audit trail Finance can check on demand, so I know firsthand what it takes to stand up an operating mechanism from zero and keep it trusted across Sales, Marketing, Engineering and Finance stakeholders.

I do not carry direct payments or fintech experience, and I would rather name that upfront than have it surface later: my program and pricing-operations scope has run through industrial B2B (Sensata), semiconductors (Applied Materials) and my own company. The operating skill your posting is asking for, building the mechanism and running the cadence that keeps a cross-functional launch on track, is the same skill in any vertical, and the Sensata promotion from Product & Growth Marketing to Pricing Lead in ten months is the clearest evidence I have that it transfers.
