Hiring Team, Walker Sands

Your posting says a RevOps Strategist maps a partner's workflows across marketing, sales and service, runs a gap analysis, and prioritizes the revenue plays that follow. That is close to what the FY2026 Bleeders and Leakers program at Sensata asked of me: I built a Power BI system that scored 1,200 opportunities against a \$627M target across 3 regions, 4 product families and 20 product lines, then surfaced \$433M in margin gaps for leadership to prioritize by salesperson and product line into actual revenue plays, not a spreadsheet nobody trusted.

I know what it is to carry that work for someone else's business, not just my own. At Pixis I hired and managed an 8-person team running 8 clients, each client its own go-to-market segment with a dedicated account strategy, media budgets of \$15K-\$90K a month and P&L targets I reported against every quarter. Cutting churn 50% there came from the same loop this role calls organizational change management: find where a client's process is leaking, propose the fix, and stay in the room until stakeholders adopt it.

I run that loop today as founder of PriceKeel, where I set up and operate the company's own CRM and CPQ, forecast and pipeline reviews, and deal approvals end to end, and I hold a HubSpot certification alongside the Salesforce and Pardot work from Sensata and Plug Power. At Applied Materials I keep automating the recurring parts of forecasting and reporting with Claude AI agents, the kind of process discipline that frees up time for the strategy work a partner actually hired RevPartners for.

RevPartners is scaling fast as the two companies combine, which means every new Strategist has to own delivery from day one rather than ease into it. I would bring the same gap-analysis-to-revenue-play pattern that held at Sensata and holds today at PriceKeel. Proof trail at adhithyabhaskar.vercel.app/ref/walker-sands.
