PITCH DECK | LEANDATA CHIEF OF STAFF

A Chief of Staff seat built on being a trusted partner to the CEO needs someone who already runs that seat, for a company of his own.

A record of owning OKR cadences, QBRs and the leadership decks behind them across four roles, including as the CEO's only right hand.

- **PriceKeel** Founder and CEO, the literal trusted-partner-to-the-CEO seat, run solo
- **4 roles** running the identical OKR and QBR cadence, weekly and quarterly
- **$433M shortlist** built from an unstaffed margin mandate with no prior owner
- **$700K+ / 2Q** recovered once that mandate had structure and a cadence
- **53% to 61%** distributor and channel-partner margins, built on new partnerships

WHY THIS DECK EXISTS

A Chief of Staff seat does not arrive with a clean lane. The job is picking the right domain each week, then closing it out.

What that actually requires

Partnering with the CEO to assess progress against the annual plan, then coordinating and executing OKRs across the company, not just inside one function.

Owning QBRs end to end: defining the structure, the metrics and the cadence, not attending a meeting someone else built.

Running the rhythm of the business: task follow-through, scheduling the key meetings, and preparing the materials behind them.

What I have already run, at that exact layer

Ran the identical **OKR and QBR cadence**, weekly and quarterly business reviews plus the leadership decks behind them, at four separate stops.

Took **Bleeders and Leakers** from an unstaffed mandate to a $433M shortlist and $700K+ recovered, the same temporary-owner instinct this seat asks for.

Founded and runs **PriceKeel** solo: CEO, CRM/CPQ owner and fundraising lead in one seat, the most literal version of "trusted partner to the CEO" available.

> **The through-line: I already run this seat for a company of my own, and have run its exact cadence inside three other companies before anyone called it a Chief of Staff job.**

THE REQ, MAPPED

What LeanData's Chief of Staff opening asks for, and where the proof already sits.

What the role covers

> *"Partner with CEO to assess company progress vs. the annual plan... Coordinate and execute OKRs."*

> *"Own quarterly business reviews (QBRs): define structure, metrics, and cadence."*

> *"Responsible for the rhythm of the business, including task follow through, scheduling key meetings and preparing advance materials."*

> *"Serve as temporary owner for unstaffed experimental projects."*

My proof

Strategic planning and OKRs: ran the OKR cadence and leadership decks behind weekly and quarterly reviews at Applied Materials, Sensata, Plug Power and Pixis, four roles running.

QBR ownership: built the Bleeders and Leakers dashboard from zero, the structure, metrics and cadence behind a $433M shortlist and $700K+ recovered.

Rhythm of the business: runs CRM, CPQ and deal approvals personally at PriceKeel, with no team to hand the follow-through to.

Temporary ownership of unstaffed work: PriceKeel's own next build, a margin layer on top of the guardrail engine, is a self-assigned unstaffed initiative.

THE PROOF, IN DEPTH

Bleeders and Leakers: an unstaffed margin mandate turned into a QBR-ready number, the same structure this seat owns.

Built as the first owner of a program with no dashboard, no cadence and no metrics defined yet, the same starting point most "figure this out" Chief of Staff priorities begin from.

$700K+ / 2Q

Margin Recovered

Negotiated from competitive gaps and customer willingness to pay, against a $627M target.

53% to 61%

Partner Margin Lift

Built the distributor and channel-partner relationships that made repricing possible in under 2 quarters.

4 Roles

OKR & QBR Ownership

Ran the identical weekly and quarterly cadence and leadership decks at Applied Materials, Sensata, Plug Power and Pixis.

The same discipline runs through PriceKeel: define the structure first, so the cadence keeps producing a number without anyone rebuilding it every quarter.

FIRST SIX MONTHS, MAPPED TO LEANDATA'S OWN MILESTONES

How the first six months would actually run, against the timeline LeanData already posted.

FIRST MONTH

Shadow the real signal

Onboard into strategy and operations, shadow the CEO and E-team's actual workflows, the same audit that grounded the Bleeders and Leakers program before a dashboard existed.

Why first: a cadence built on assumptions instead of the real workflow is the fastest way to lose the executive team's trust.

FIRST 3 MONTHS

Implement the OKR and meeting cadence

Stand up the OKR and weekly E-team meeting cadence, and bring a CEO playbook recommendation built on four roles of running that exact rhythm already.

Why now: a cadence only earns trust once it is implemented, not proposed.

FIRST 6 MONTHS

Own the QBR and board prep

Lead execution on the strategic initiatives already in motion, and take direct ownership of QBRs and board prep: the structure, metrics and cadence this seat is built around.

Why this fast: Bleeders and Leakers went from unowned to a $433M shortlist on a similar timeline.

CLOSE

LeanData needs a right hand who already runs this seat, for a company of his own and for three others. I already do.

The core proof is Sensata and PriceKeel together: a **$700K+ margin program** built from zero structure into a QBR-ready number, and a company of his own where he is the CEO's only trusted partner, owning CRM, CPQ and fundraising personally.

What is harder to find is someone who has run that exact OKR and QBR cadence inside three other companies too, Applied Materials, Plug Power and Pixis, so the pattern is not a one-off. That repetition, more than any single number, is what a two-year Chief of Staff seat needs most.
