EXPERIENCE

Strategic Marketing III, Applied Materials Jun 2026 - Present

- Automates repetitive analysis work with **AI agents built on Claude**, the same self-serve, build-it-yourself instinct this role's AI-enabled creative model is written for.
- Builds **forecasting and market-sizing models** across multiple product groups, turning field and technical input from Sales, Engineering and Accounts into one audience view that messaging decisions get built on.

Pricing Lead, Sensata Technologies Jul 2025 - May 2026

- Drove **+12% YoY revenue and +8% market share** via price realignment built on competitive benchmarking across 10+ key players, the translate-evidence-into-a-clear-recommendation muscle a creative testing roadmap runs on just as much as a pricing one.

Product & Growth Marketing, Sensata Technologies Sep 2024 - Jun 2025

- Owned **positioning and messaging** that turned technical sensor features into customer value propositions, lifting conversion 15% on priority launches, the message-to-funnel translation this role owns end to end.
- Ran **30+ customer interviews** with OEMs and distributors to surface unmet needs, insights that fed the product roadmap and raised CSAT 22%, the audience-insight-into-hypothesis loop a creative strategist repeats every quarter.
- Led **digital marketing and paid launch campaigns** across email and paid channels, generating +35% qualified leads, then built sales enablement decks and case studies for 50+ reps that lifted win rates 30%.

Digital Marketing Manager, Plug Power Oct 2022 - Jul 2023

- Built the **landing page and paid-media testing program** behind $100K/month in budgets across multiple business units, running Paid Search and Paid Social on Google Ads, Microsoft Ads, Meta and LinkedIn with bid optimization that cut CPA 25%.
- Closed the loop between **creative changes and conversion**: customer research that reframed messaging lifted conversion 20% and cut CPA 15%, direct evidence for which concept to scale and which to kill.
- Rebuilt the **WordPress and Pardot lead flow** so landing-page and email tests could ship without an engineering queue, cutting cost per lead 50% and raising organic search visibility 35%.
- Ran **15+ A/B tests** and analyzed 50+ inbound campaigns across the Mar-Tech stack (Salesforce, Adobe Analytics, GA, Google Tag Manager), tying creative and channel changes to MQL quality and stage 1 opportunity volume.

Customer Success Manager, Pixis (AI Platform) Jul 2021 - Sep 2022

- Delivered **3x ROAS in one month** for a leading fashion brand through full-funnel creative restructuring: shopping-feed cleanup, smart bidding, creative refresh and lookalike expansion, the test-the-concept-then-scale-it motion this role runs portfolio-wide.
- Hired and managed an **8-person team** running 8 client accounts with per-client media budgets of $15K-$90K/month, carrying P&L and revenue targets across paid and retail media channels.
- Used **Amplitude and Tableau** across 30+ campaigns to separate creative signal from media-delivery noise, lifting ROAS 40% and cutting client churn 50% through account strategy and channel diversification.
- Scaled **PPC across international, non-English markets**, retail media (Amazon Ads, Criteo) and iOS app UA (Appsflyer, Adjust), carrying winning creative concepts across channels and formats.

Senior Digital Marketing Analyst, GenY Medium Jan 2020 - Jun 2021

- Rebuilt **Google Merchant Center and Meta catalog feeds** to deliver 16x ROAS for D2C e-commerce brands, then audited SEO site structure (backlinks, keywords, internal linking, content) that lifted a separate B2B startup's conversion rate 36% and revenue 25%.

PROJECTS

SwipeHire

- Built an **AI job-matching platform** (Python, OpenAI API, React) zero-to-one, writing the PRD, scoping the MVP and shipping auto-tailored resumes and visa-aware matching that onboarded 50+ early users.
- Instrumented the **GTM and analytics stack** (GA4, GTM, event tracking, funnel dashboards) solo, running 8+ A/B tests with significance gates and 12+ user interviews that lifted activation 25%, the self-serve build-test-iterate loop this role runs at scale.
