PITCH DECK | INSTACART DEAL DESK SPECIALIST

Deal velocity, risk and compliance, and Quote-to-Cash excellence are one connected job, not three. I have already run every piece of it, for my own company and for a multi-$100M industrial business.

Deal-desk judgment, CRM/CPQ system ownership and a Finance-auditable governance trail from someone who built the audit trail, not just filed the quote.

- **$700K+** margin recovered in 2 quarters via deal-by-deal customer quote review at Sensata
- **53% to 61%** distributor margin lift from repriced, risk-reviewed contract terms
- **CRM + CPQ** and deal-approval workflow owned end to end, founder of PriceKeel
- **1,200 opportunities** tracked against a $627M target across 3 regions, 4 product families, 20 lines
- **Claude AI agents** automating recurring pricing analysis at Applied Materials

WHY THIS DECK EXISTS

Your posting names five things deals need at once: velocity, risk review, a clean Quote-to-Cash process, cross-functional trust and scalable new programs.

What losing that discipline runs into

A deal desk without fast, correct review does not fail loudly. It fails as a quote stuck in approval while Sales waits, a contract term nobody flagged until after signature, and a Quote-to-Cash process that works until a new pricing model or acquisition hits it.

Sales, Finance, Tax and Legal all touch the same deal, so a gap in any one review step becomes everyone's cleanup problem at close, not just Deal Desk's.

The fix is not another approval queue. It is someone who treats deal review, system ownership and governance as one connected loop instead of three handoffs.

What I have already run

At **PriceKeel**, I set up and run the CRM, CPQ configuration, forecast and pipeline reviews, and deal approvals myself, the same Quote-to-Cash ownership this role holds for Instacart's Sales org.

At **Sensata**, I read multimillion-dollar customer quotes and AP26 revenue models for risk and approved terms before signature, then scaled that discipline into a program covering 1,200 pricing opportunities.

Both mean I have sat on the deal-review side and the system-ownership side of the same approval, not just one or the other.

A Deal Desk Specialist who owns deal velocity, risk and compliance, Quote-to-Cash excellence, cross-functional partnership and scalable new programs is describing this exact loop: review the deal, run the system, keep the trail honest.

THE REQ, MAPPED

What the Deal Desk Specialist opening asks for, and where the proof already sits.

What the role covers

Deal Velocity: pricing, discounting and structure are reviewed and approved quickly and correctly, so Sales spends its time selling.

Risk and Compliance: contract risks are spotted before signature, and every deal aligns with ASC 606 and approval policies.

Quote-to-Cash Excellence: the Salesforce/CPQ process runs cleanly end to end, documented and consistent.

Cross-Functional Partnership and Scalable New Programs: Sales, Finance, Tax and Legal share one playbook as new products and pricing models roll out.

My Proof

Deal velocity: owned deal-by-deal customer quote review inside the Bleeders and Leakers program at Sensata, recovering $700K+ in margin in 2 quarters without slowing approvals.

Risk and compliance: read multimillion-dollar customer quotes and AP26 revenue models for risk, and built the PriceKeel audit trail that gives Finance an explainable record behind every pricing decision.

Quote-to-Cash excellence: set up and run PriceKeel's own CRM and CPQ configuration, forecast and pipeline reviews, and deal approvals end to end.

Cross-functional partnership and scale: partnered with senior executives, Sales and Engineering at Sensata and Applied Materials, and scaled the Bleeders and Leakers program into a dashboard covering 3 regions, 4 product families and 20 product lines.

THE PROOF, IN DEPTH

Bleeders and Leakers: make every quote fast to approve and easy to audit, at the same time.

Built as a BU-wide Power BI system covering 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines, with every gap traced to a specific deal record before leadership set the next quarter's targets.

$700K+

Margin Recovered, 2 Quarters

Deal-by-deal customer quote review against competitive gaps and each account's own deal history, the same review this role runs on every transaction.

53% to 61%

Distributor Margin Lift

Repriced the channel logic and documented the new terms for governance review, so the discount limits held past the first quarter.

$433M

Margin Gaps Surfaced

Every gap traced to a specific deal by salesperson and product line, the same auditable detail a Quote-to-Cash process needs end to end.

At PriceKeel that same instinct became the operating model: I run the CRM, CPQ and the audit trail myself, so the deal and the governance record are never two different stories.

FIRST 30 DAYS

What the first month owning deal desk at Instacart looks like.

WEEK 1

Learn the Quote-to-Cash flow and approval policies

Sit with Sales, Finance, Tax and Legal to walk the current SFDC/CPQ setup, discount-approval policies and ASC 606 checkpoints, and shadow one deal end to end from quote to booked revenue.

Why first: the same instinct that had me learn PriceKeel's own CRM and CPQ configuration before building anything on top of it.

WEEK 2-3

Own a deal-review and risk-flagging cycle

Take ownership of a live batch of deals end to end: review pricing and discount structure for approval, read each contract for risk, and flag anything that needs Legal or Tax before it reaches signature.

Why now: the same contract-risk discipline that let me approve multimillion-dollar customer quotes at Sensata without surprises after signature.

WEEK 4

Document the playbook for a new program

Pick one scalable new program, a pricing model or product line, and document the approval playbook and CPQ setup needed before volume arrives, then train the Sales team on when to engage Deal Desk.

Why this fast: a shared playbook only earns its keep if it is written down before the volume hits, not after.

CLOSE

You are hiring someone to keep deal velocity, risk review and Quote-to-Cash honest across every deal. I have already built that discipline, from both sides of the desk.

The core proof is Sensata: a Power BI system tracking **1,200 pricing opportunities against a $627M target**, distributor margins lifted **from 53% to 61%**, and $700K+ in margin recovered in 2 quarters through deal-by-deal customer quote review and contract risk evaluation.

What is harder to find is someone who has also spent the last several months owning the CRM, CPQ configuration, deal approvals and audit trail for his own company's deal flow. **I built that at PriceKeel**, so the Quote-to-Cash ownership and governance discipline this role runs is not something I would need to learn on the job.
