SUMMARY

Runs **complex, cross-functional strategic initiatives** end to end with limited guidance. At Applied Materials I align Sales, Engineering and Accounts into one global view and own the **business operations cadence** (OKRs, annual target setting, weekly and quarterly business reviews) behind P&L targets across multiple product groups. At Sensata I designed the FY2026 Bleeders and Leakers **reporting framework** and its underlying processes, turning operational data into the actionable insights that surfaced $433M in margin gaps for Director-level stakeholders, then carried that discipline directly into **sales operations**: AP26 forecasting, multimillion-dollar customer contracting, and a margin recommendation built to drive +8% market share. I automate the recurring half of this work with Claude AI agents so the judgment calls stay mine.
